Hydraulic and electro-hydraulic technology at a glance

Implements and controls hydraulic and electro-hydraulic circuits
Transparent methacrylate body with internal industrial metal parts

In the following TECHNOLOGIES...

HYDRAULICS
HYDROMODEL-200 - Transparent Hydraulics - Electro-hydraulics

HYDROMODEL-200 meets training needs for technology related to hydraulic components in a very visual way.

The parts are made up of a transparent methacrylate body with internal industrial metal parts. Using this system, it is possible to see inside the components as they operate, becoming familiar with them and understanding how they work.

Hermetic connections

The hoses, as well as the different devices, are connected to each other with a system of quick-fit self-sealing connectors NW4 1/8”.

This system guarantees a maximum level of fluid integrity with ZERO LEAKAGE even during connection/disconnection operations.

Fixing to the panel

Each component includes a fixing system to aid quick and simple preparation of practical exercises.

Kits

HYDROMODEL-200 has 3 standard kits defined to cover training demands at different educational levels. Users can configure personalised sets to meet their own requirements or add to previously purchased equipment.

HYDROMODEL-200 - With this system you could...

HYDROMODEL-200 comes up with different practical activities targeting skills in the technologies featuring in the table (below).

This shows how the HYDROMODEL-200 is suitable to develop skills in the specific technology.

This shows that HYDROMODEL-200 can help develop skills in the specific technology even though there are other more appropriate products in the range.

@ eLEARNING-200

Find out more about the theory behind the technologies developed in HYDROMODEL-200 with our eLEARNING-200 courses.

RELATED eLEARNING-200 COURSES

- Introduction to electricity (SMC-102)
- DC electricity (SMC-103)
- AC electricity (SMC-104)
- Solid state (SMC-105)
- Sensors technology (SMC-108)
- Hydraulics / electrohydraulics (SMC-111)

*See eLEARNING-200 chapter for more information.
HYDROMODEL-200 - Extra equipment

There are other products in the range to complement HYDROMODEL-200.

- autoSIM-200

autoSIM-200 is software that can design and simulate pneumatic, electro-pneumatic, hydraulic circuits, etc. It is also used for programming them plus monitoring and control of pre-defined 2D and 3D models.

*See autoSIM-200 chapter for more information.

HYDROMODEL-200 - Complete laboratory

Discover our proposal for laboratories and the best combination of the HYDROMODEL-200 and other accessories in the chapter “Product packs”.

HYDROMODEL-200 - Configuration

Getting the right HYDROMODEL-200 configuration is as easy as:

- Steps to follow

1.- Select the panel and the necessary extras.

2.- Select the chosen standard kits or a personalised configuration.

3.- In the event of preferring a personalised configuration, select the references chosen for the composition.

HYDROMODEL-200 - Customized kits

The available hydraulic and electro-hydraulic components are listed below, by category.

Assembly panel, hydraulic unit and extras

SAI2064 - Vertical mounting panel for 2 work posts
- External dimensions: 1150x760x410mm*. Allows work to be carried out on both sides, optimizing investment and space.
*Other dimensions available on request.

SAI2065 - Rolling table with twin-post
The entire rolling frame system may be disassembled for transportation.
The vertical panel means you can work on both sides.
Panel dimensions: 1150x760x25mm
- It has a work-top for horizontal work, 1200x800mm.
The lower section features a 1200x600mm metal shelf containing the component storage drawers block, the portable hydraulic pump, etc.
4 wheel support, 2 of them with brake and 2 without brake, and high loading output.
Total dimensions: 1200x800x1700mm.

SAI9410 - Portable hydraulic pump for transparent hydraulic
- Transparent tank holding 6 litres.
- Gear pump. Q= 1 l/min.
- Pressure relief valve, Pmax: 10 bar.
- 3 quick connector couplings (P + 2T)
- Air bubble insertion system in the circulation oil.
* Does not include oil drum. SAI9411 necessary.

SAI2074 - Storage drawer blocks for rolling table with lock
- Compact 4-drawer block with slide guides to house the components.
- External dimensions: 500x725x650mm.
- With security lock.

SAI9411 - Oil with special red colouring
- Specially coloured oil for using with transparent elements.
- Quantity required for portable hydraulic pump.

Didactic support
SAI9496- User’s and practical manual
SAI9553 - Theoretical concepts manual
Actuators

SAI9412 - Double acting cylinder
- ø20/ø10 x 58mm of stroke.
- Max. Pressure: 10bar.

SAI9419 - Single acting cylinder
- ø20/ø10 x 40mm of stroke. Spring return.
- Max. Pressure: 10bar.

SAI9457 - Double rod cylinder
- ø14/ø20/ø14 x 100mm of stroke.
- Max. Pressure: 10bar.

SAI9401 - External gear motor
- Two-way hydraulic motor, with external gears.
- With two gears with 12 teeth and one shaft.

SAI9436 - Axial piston motor
- Two-way hydraulic motor with axial pistons.
- 7 metal pistons Ø12 over inclined plane.
- Connections A, B and L drainage.

SAI9435 - Vane motor
- Two-way vane hydraulic motor with one shaft. 8 vanes acting on eccentric rotor.

SAI9438 - 180° rotary actuator
- Oscillating two-way hydraulic motor.
Distribution valves

SAI9442 - 2/2 directional control valve. Manually operated
- Manually-operated and spring return.
- With drainage.

SAI9445 - 3/2 directional control valve. Manually operated. Seat type
- Manually-operated and spring return.
- Max. Pressure: 10bar.

SAI9413 - 4/2 directional control valve. Manually operated
- Manually-operated and spring return.
- Max. Pressure: 10bar.

SAI9446 - 4/2 directional control valve. Manually operated. Mechanical interlocking
- Manual operation on both sides.
- Max. Pressure: 10bar.

SAI9447 - 4/3 directional control valve. Manually operated. Closed mid-position
- Manual operation on both sides and spring centered.
- Max. Pressure: 10bar.

SAI9449 - 4/3 directional control valve. Manually operated. Relieving mid-position
- Manual operation on both sides and spring centered.
- Max. Pressure: 10bar.

SAI9450 - 4/3 directional control valve. Manually operated. P-A-B-T linked in mid-position
- Manual operation on both sides and spring centered.

SAI9431 - 4/2 solenoid valve, spring return
- Coil-operated and spring return.
- Max. Pressure: 10bar. Low consumption coil (12w).
*Connector for SAI9272 coil required.
SAI9482 - 4/2 solenoid valve with mechanical interlocking
- Bistable. Coil-operated on both sides.
- Max. Pressure: 10bar. Low consumption coil (12w).
*Connector for SAI9272 coil required.

SAI9440 - 4/3 solenoid valve with closed mid-position
- Coil-operated on both sides and spring centered.
- Max. Pressure: 10bar. Low consumption coil (12w).
*Connector for SAI9272 coil required.

SAI9483 - 4/3 solenoid valve. A-B-T linked in mid-position
- Bistable. Coil-operated on both sides.
- Max. Pressure: 10bar. Low consumption coil (12w).
*Connector for SAI9272 coil required.

SAI9484 - 4/3 solenoid valve. A-B-P linked in mid-position
- Bistable. Coil-operated on both sides.
- Max. Pressure: 10bar. Low consumption coil (12w).
*Connector for SAI9272 coil required.

SAI9485 - 4/3 solenoid valve. A-B-P-T linked in mid-position
- Bistable. Coil-operated on both sides.
- Max. Pressure: 10bar. Low consumption coil (12w).
*Connector for SAI9272 coil required.

SAI9403 - 4/3 proportional directional control valve, direct control.
- Distributor valve 4/3 with gradual opening, depending on the value of the electrical control signal.
- A, B and P connected in mid-position. T closed.
- Coil-operated on both sides. Spring centered.
- Max. Pressure: 10bar. 24Vcc / I nominal: 0.8A coils.
*Connector for SAI9303 coil required.

SAI9404 - 4/3 proportional directional control valve.
- Distributor valve 4/3 with gradual opening, depending on the value of the electrical control signal, with a principal stage and another pilot stage.
- Coil-operated on both sides.
- Max. Pressure: 10bar. 24Vcc / I nominal: 0.8A coils.
*Connector for SAI9303 coil required.
Pressure control valves

SAI9402 - Proportional pressure relief valve, direct control
- Regulates the maximum pressure value at a point using an electric control signal.
- Coil-operated 24Vcc / I nominal: 0.8A.
- Max. Pressure: 10bar.
*Connector for SAI9303 coil required.

SAI9414 - Pressure relief valve (ball valve), direct control
- It enables the maximum pressure value at the input to be adjusted, unloading to the tank from the adjusted value.
- Manual adjustment using the twist handle.
- Max. Pressure: 10bar.

SAI9418 - 3 way pressure relief valve, with damping
- Opens the oil flow when the preset pressure value is reached at the input.
- Direct control. Manual adjustment by rotary knob.
- Max. Pressure: 10bar.

SAI9420 - Pressure reducing valve, 3 way. Direct control
- It enables the pressure value at the output, at A, to be adjusted.
- Manual adjustment by rotary knob.
- Max. Pressure: 10bar.

SAI9459 - Pressure relief valve. Pilot operated
- Two-stage limiter valve, one pilot and the and other principal
  It can work as a sequence valve, opening from P to T when P
  reaches the pressure value set.
- Manual regulation by rotary knob.
- Max. Pressure: 10bar.

SAI9460 - Discharge valve
- Opens the oil flow when the preset pressure value is reached at the pilot.
- Discharge valve by external pilot.
- Manual regulation by rotary knob.
- Max. Pressure: 10bar.

SAI9463 - High - Low pressure circuit
- Manual adjustment by two rotary knobs.
- Max. Pressure: 10bar.
- Comprised of a circuit of two adjustable limit valves and a non-return valve.
- All in the same body.
Flow valves

**SAI9439 - Proportional flow control valve with pressure compensation**
- Coil-operated 24Vcc / I nominal: 0.8A
- Max. Pressure: 10bar.
*Connector for SAI9303 coil required.

**SAI9422 - Manual shut-off valve, 2 way**
- Opens or closes the oil flow with an activation lever.
- Max. Pressure: 10bar.

**SAI9423 - Piloted check valve**
- Normally it allows the oil to pass in one direction only, but it does it in both directions when there is pressure in the pilot connection.
- Max. Pressure: 10bar.

**SAI9415 - One way restrictor**
- It enables the oil to flow on one direction only.
- Max. Pressure: 10bar.

**SAI9416 - Two way flow control valve**
- It enables the oil flow in both directions to be adjusted.
- Two-way flow control valve, with two ports, needle. Manual adjustment by rotary knob.
- Max. Pressure: 10bar.

**SAI9424 - Flow control valve with pressure compensation**
- It enables the flow to be adjusted regardless of the pressure values at the input and output.
- Manual regulation by rotary knob.
- Max. Pressure: 10bar.

**SAI9421 - One way flow control valve**
- It enables the oil flow in one direction to be adjusted and flow to be unrestricted in the opposite direction.
- Max. Pressure: 10bar.

**SAI9468 - Flow divider**
- Flow divider valve: it divides the inlet flow into two equal parts.
- Max. Pressure: 10bar.

**SAI9469 - Circuit selector with logic function “OR”**
- Max. Pressure: 10bar.
Connection parts and accessories

SAI9425 - Set of 5 hoses
- Set of 5 transparent polyurethane tubes.
- Max. Pressure: 10bar. 520 mm length.

SAI9408 - Set of 10 hoses
- Set of 10 transparent polyurethane tubes.
- Max. Pressure: 10bar. 520 mm length: 6 units. 350 mm length: 4 units.

SAI9405 - 6 connection distributor on manifold
- Max. Pressure: 10bar.

SAI9407 - 4 connection divider
- Max. Pressure: 10bar.
- With three self-sealing plugs and 1 socket.

SAI9406 - Cross distributor with pressure gauge
- Distributor with 3 connections with pressure gauge from 0 to 16 bar.
- With two self-sealing plugs and 1 socket.

SAI9461 - Pressure gauge without container
- Without box or scale for viewing the internal mechanism.
- Max. Pressure: 10bar.
- With one self-sealing plug and one socket.

SAI9462 - Pressure filter with clogging indicator
- Oil filter to fit at the high pressure input of the user circuit.
- Potential-free output by switched contact.
- Max. Pressure: 10bar.

SAI9464 - Piston accumulator
- Max. Pressure: 10bar.
- Load pressure (nitrogen): 4 bar.

SAI9466 - Diaphragm accumulator
- Max. Pressure: 10bar.
- Load pressure (nitrogen): 4 bar.
Control modules, sensors and electrical accessories

**SAI9309 - Power supply module for two proportional coils**
- Potentiometer for controlling the output intensity to coils a or b.
- I max. = 0.9 A per coil.
- Overload electronic internal protection.
- Dither frequency on/off switch and Dither frequency value adjustment.
- 2 ammeters for displaying the current via coils a or b.

**SAI9303 - Set of connectors for proportional coils**
- Connectors with LED indicators (screen type). Long. 1.5 m.
- It includes 2 units (1 grey connector and 1 black connector).
- Indication on screen of light intensity proportional to the intensity value.

**SAI9040 - Power supply**
- Voltage input 110V - 240VAC.
- Output: 24VDC / 5A.
- Short-circuit protection.
- Input switch and LED display.
- Built-in power cable.
- 4 mm female electrical safety connectors.
- Insulating box with screen printed lid.

**SAI9042 - Set of pushbuttons**
- 2 pushbuttons with spring return.
- 2-position selector.
- 4 mm female electrical safety connectors.
- Insulating box with screen printed lid.

**SAI9041 - Set of 3 relays**
- It includes three relays with coil 24V and 4 switchable contacts.
- LED activated relay display.
- 4 mm female electrical safety connectors.
- Insulating box with screen printed lid.

**SAI9231-R / SAI9231-L - Electric end of stroke (right / left)**
- Retractable roller driven.
- R=right, L=left.
- 1 contact NO, 1 contact NC.
- Transparent body and roller with reversible position.
- 4 mm female safety connectors.

**SAI9272 - Set of connectors + cable for solenoids**
- Male connectors 4 mm. Cable 1.5 m.
- Ready to connect in solenoid valve coils.
- It includes 3 units (1 black connector and 2 grey connectors).
- LED indicators.

**SAI9046 - Set of cables with electric connector 4 mm**
- 5 red cables 1.5 m.
- 5 black cables 1 m.
- 10 yellow cables 0.5 m.
- 5 blue cables 0.25 m.
