SMC Webinar: PneuDraw

Choose the time slot that fits best and register now:

[10:00-11:30 a.m. CEST](#)

[03:00-04:30 p.m. CEST](#)

You want to create your pneumatic circuit diagrams rapidly and straightforwardly?

Then it's time for our „SMC PneuDraw“ tool - planning and creation of circuit diagrams including bill of materials have never been easier. In this 90-minute webinar, our experts Daniela Sezig and Stefan Leis are going to explain you how SMC PneuDraw can support your workflow in an efficient way. Among other things, you will gain insights into the basics of creating pneumatic circuit diagrams, how to draw and use your own symbols and headers, and also how circuits can be automatically imported from the SMC FRL and Valve Manifold Configurators.

We look forward to sharing our expertise with you:

Thursday, 20 May 2021

Morning Session: 10:00-11:30 a.m. CEST

or

Afternoon Session: 03:00-04:30 p.m. CEST

We look forward to your participation!
