

CORPORATE GUIDE

SMC: Trusted General Manufacturer of Automatic Control Equipment

SMC manufactures pneumatic equipment and machine elements that play an essential role in the automation of various industries, from robots and other devices required in the automation of factory production line manufacturing and assembly processes to automatic inspection equipment used for medical and semiconductor manufacturing equipment.

With globalization has come a growing demand for IT, robot, and AI solutions. It is now more important than ever to not only simply understand our customers' needs but to anticipate their future needs in order to provide true customer satisfaction.

SMC places a heavy importance on listening to each and every customer carefully in order to appropriately respond to their needs in a timely manner.

SMC's tightly-knit global network enables the provision of close communication, sophisticated technical services, and a stable supply of products—all in the name of customer satisfaction.

Medical/
Nursing care

SMC possesses the largest market share in both domestic and international markets.

Japan market share

Global market share

The stage is set for the endless possibilities that pneumatic control technologies have to offer.

The development of sophisticated automation in the industrial world has sparked a rapid growth in the use of pneumatic components in other industries. Pneumatic components are no longer only a mainstay of core industries such as the energy, automotive, electronics, and machinery industry; they are now being used in a growing number of other industrial fields as well. As the demand for high-tech applications continues to grow at lightning speed, pneumatics will continue to play an important role in supporting the information technology industry, and industrial robot industry—which includes medical and nursing care support robots—and other technological advances such as the shift to smart factories. We are happy to say that the future of pneumatics appears to be a bright one.

Electronics

Semiconductor

Food

12,000 basic models and 700,000 variants A wide range of product variations

A complete lineup of pneumatic control systems

As a general supplier of pneumatic components, SMC is able to provide a complete system of product suitable to a variety of applications. Our broad range of product variations available for each system component is what allows SMC to offer a pneumatic system that is capable of specifically meeting the diverse needs of our customers.

Air Preparation Equipment

Components which generate clean air through the dehumidification and filtration of compressed air

Air Preparation Filters

Air Dryers

Directional Control Valves

Components which control air cylinders and other actuators by switching the flow direction of compressed air

Wireless System

Solenoid Valves

Air Line Equipment

Components which remove moisture and solid foreign matter from compressed air, provide pressure control, or supply lubrication as well as components for speed control and piping

Modular F.R.L Units

Fittings

Flow Control Equipment

Tubing

Actuators

Components which use the compressed air switched by directional control valves to create force for linear action, rotary action, or gripping

Rotary Actuators

Air Grippers

Air Cylinders

Detection Switches

Switches that monitor various fluids, such as air or water, to control pressure and/or flow rates

Pressure Switches

Flow Switches

Static Neutralization Equipment

Static neutralization equipment that prevents product damage and the adhesion of foreign matter due to static electricity

Ionizers

Electrostatic Sensors

riations: to accommodate various applications

SMC Products in Peripheral Markets

SMC products are no longer only for use in conventional pneumatic control systems. We are continually expanding our product lineup to cover peripheral markets as well. SMC products have always been developed to satisfy unique requirements, and our commitment to customer satisfaction is the driving force behind our pursuit of developing products for new markets.

Electric Actuators

Electric components which make use of a variety of controllers and electric motors to provide highly accurate multi-point positioning and shockless transport

Vacuum Equipment

Vacuum equipment that generates a vacuum state by supplying compressed air for workpiece adsorption and transfer applications

Grippers for Collaborative Robots

Workpiece adsorption and gripping devices for mounting on robots

Temperature Control Equipment

Components which provide precise temperature control such as thermo chillers with refrigeration technology and thermo controllers with thermoelectric device technology

Process Valves

Process valves that can switch the flow of various fluids such as air, medium vacuum, water, oil, steam, etc.

Chemical Liquid Valves

Components which are compatible with chemical liquids, such as acid, alkali, and super-pure water, used in semiconductor and medical devices

High Vacuum Equipment

High vacuum valves that are used for semiconductor manufacturing equipment

Process Gas Equipment

For UHP gas delivery in semiconductor and other clean industries.

Environmentally friendly production process and product performance improvements

Over the years, SMC has continued to take on its social responsibility to seriously promote and support sustainability in order to minimize negative impacts to the environment. SMC is always looking to develop newer and greener solutions with CO₂ reduction as a top priority as a leader in the field of pneumatics.

One of the key components of our comprehensive approach is the designing of compact and lightweight products. Smaller, lighter products require less raw materials to make and less time to process. In addition, the products themselves use less energy. All of these efforts contribute to reduced CO₂ emissions. SMC's fully integrated technical, production, and sales departments are able to respond to the needs of our customers from around the world with a shared goal of finding new methods to effectively protect the environment.

1,700 experienced engine to meet the specific need

Pneumatic control is entering a new era of high technology. This is demonstrated by its merging with the rapidly growing field of information technology, its expanding into the life science field, and its increasing role in environmental responsiveness and energy saving. SMC is responding to pneumatics' growing role by making improvements in performance, quality, and durability as well as by incorporating themes of high-performance, multi-functionality, miniaturization, and new materials. It is by pursuing research and development in multiple fields that we are able to produce a constant flow of new products.

In addition, by considering international standards from the inception stage, we are able to create products that can be applied worldwide.

Our highly qualified engineering staff, comprised of 1,700 specialists from a great number of fields, is ready to provide our customers with prompt and detailed solutions to their specific problems.

Our numerous facilities allow us to respond appropriately to market needs in a timely manner.

By researching electronic control technologies and developing products for fields such as the semiconductor industry, SMC's research and development division is always ready to adapt products to the changing times. Thanks to our product development facilities, we are also able to provide our customers with an extensive variety of experimental equipment for cooperative research.

SMC's global engineering Featuring technical center China, and Japan

Following the basic concept of developing products from the customer's standpoint, SMC dedicates a great deal of staff and financial resources to research and development. This is undertaken to promote research on basic technology with future potential and to produce products that meet the needs of the marketplace in a timely manner. To provide speedy solutions to all our customers' problems, technical centers have been established in the U.S., Europe, and China, creating a powerful global engineering network with Japan as its nucleus. By constantly exchanging information and maintaining a strong focus on BCP support, our technical centers are able to continue research and development even in the event of an emergency, thus allowing SMC to continue offering customers worldwide the same high standard of technical service quality they are accustomed to.

ETC European Technical Centre (United Kingdom)

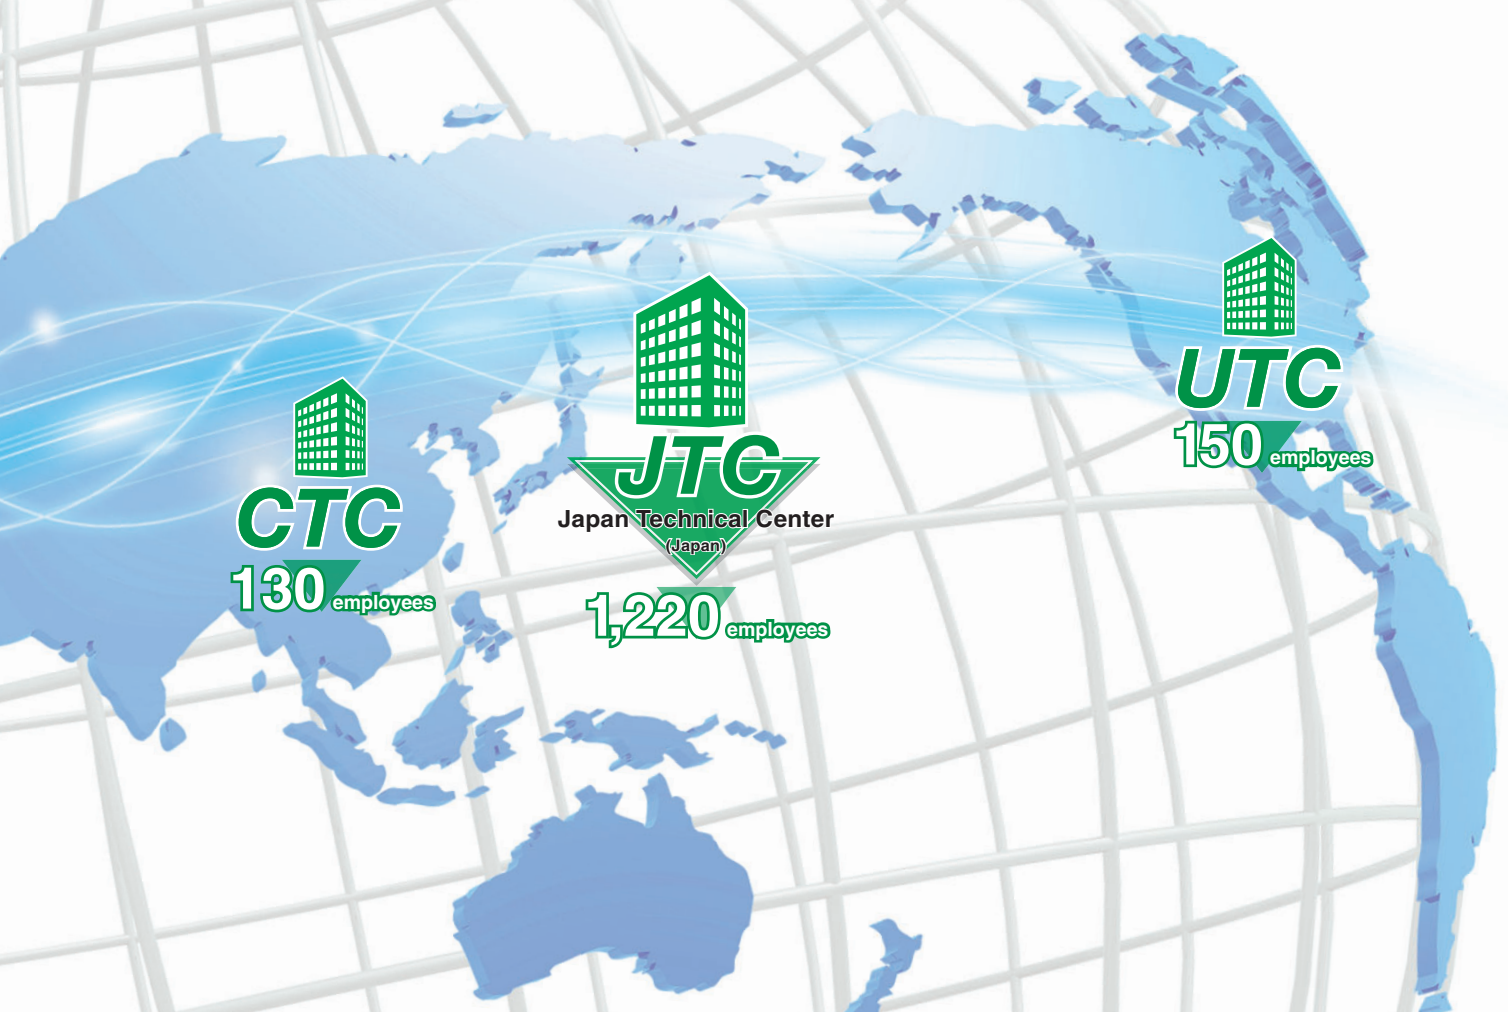

The SMC UK Central Office in Milton Keynes provides support to the European market. Through SMC's far-reaching testing and development program, the provision of high-quality solutions—from concept to production—is possible. In addition, SMC offers products in compliance with European standards and directives as well as support and training in order to realize full product compliance.

GTC German Technical Centre

While keeping up with technological trends in Germany, the center of the European industry, SMC is able to support each customer's unique designing and manufacturing needs via direct communication. This includes individualized support such as the development of made-to-order and unitized products, the proposal of solutions, and project management.

With 130 employees, the CTC provides a structure for product development and technical support that can respond quickly to the diverse needs of our customers in the various industries and regions of China.

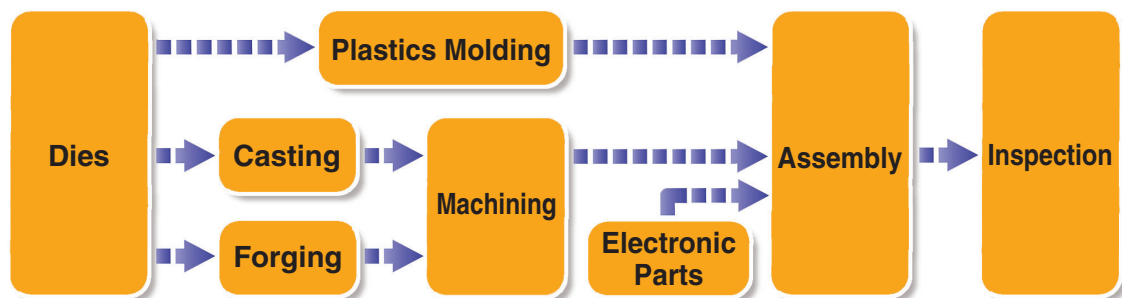

Through fundamental product data management, the UTC is able to offer support to each industry including those dealing with semiconductor manufacturing equipment, food and packaging machines, medical equipment, large vehicle and automobile manufacturing, as well as machinery manufacturing. The range of activities includes everything from basic product support for our standard products to the designing of made-to-order products and testing.

SMC's unique production Bringing you high-quality with short lead times

SMC products reflect the market trend of greater diversification with 12,000 basic models and over 700,000 available variations. This is made possible by an integrated production system that includes casting, machining, surface treatment, coating, assembly, and inspection, all of which are performed in SMC's factories in order to quickly supply high-quality products to our customers. Furthermore, we use a unique production control system in which instructions for all production operations are performed automatically based on the information from the order received. As a result, SMC can provide products with short lead times.

Distribution Centers

One-to-one communication network and an experience organization

In order to satisfy each individual customer, SMC believes it is essential to promote sales activities that emphasize personal contact. The function of our sales staff is not simply to take the customers' orders but to accurately gauge the customers' needs and desires. They play an important role in the development of new products and services by providing vital feedback to the technical and production departments. For this reason, we invest a great deal in our support network and sales organization with the aim of developing closer relationships with our customers and becoming more familiar with their needs. SMC's sales force of 1,100 in Japan and 7,200 internationally is continually striving to cultivate closer communication with our customers.

Partnership Program

1

DEDICATED CORPORATE ACCOUNT MANAGER

An SMC Corporate Account Manager is assigned as your one-point person of contact. They work closely with your Corporate HQ Sponsors, Engineers and all production facilities - to deliver, create, manage and execute all collaborative program objectives.

2

LOCAL FACTORY SUPPORT

SMC has over 6,000 local sales engineers in about 80 countries and regions to support all of your local production facilities.

3

DESIGN ENGINEERING SUPPORT

To fully support your Engineers - SMC has 1,700 dedicated R&D Engineers that can develop new products or solutions. SMC can quickly customize or modify existing components to meet design standards or unique applications.

7

COMPRESSED AIR ENERGY SAVINGS ASSESSMENTS

SMC has developed a Streamlined Energy Savings Assessment program for our Corporate Accounts. Our goal is to find innovative solutions to reduce waste of compressed air in the factory environment.

8

MACHINE ANALYSIS ASSESSMENTS

SMC will perform plant level machine analysis to improve machine performance, identify waste, reduce scrap rate and improve line efficiency.

9

STOREROOM ASSESSMENTS

SMC will perform plant level storeroom assessments to reduce vendor base, eliminate duplication, standardize components, identify critical spares and offer cost savings solutions.

eumatic technology, olutions for your automation needs.

4 MACHINE SAFETY SUPPORT

SMC will work with your engineering staff and local facilities for design assistance related to plant safety upgrades to meet Machinery Directives, ISO 13849-1 or IEC61508/62061.

5 OEM MACHINE SUPPLIER SUPPORT

SMC will support your OEM Machine suppliers with the integration of SMC specified components. SMC will provide pricing support, innovative design assistance and SMC project management to ensure on-time delivery and commissioning of new machines or lines.

6 CRITICAL SPARE PARTS FOR NEW OEM MACHINES

SMC will work with local factories receiving new OEM machines - to ensure all critical spare parts are available and onsite prior to production.

10 HIGH USAGE SPARE PARTS ANALYSIS

SMC will work with all local plants to identify high usage pneumatic components. SMC will conduct failure mode analysis and offer robust alternatives to ensure better performance and uptime on machines where components are used.

11 IMPROVEMENT ACTIVITY REPORTS

SMC will document all Corporate Account application successes with Improvement Activity Reports (IAR's). These IAR's are a one-page overview of the application - highlighting operational improvements, energy savings, cost savings details or plant process improvements. These IAR's are designed to be shared with other facilities to duplicate activity.

12 ONSITE & ONLINE TRAINING CLASSES

SMC offers customized onsite and online training classes - on a variety of subjects related to pneumatic components, electric actuators, energy savings, optimal machine design and TPM methodologies.

With the largest global market presence in approx. 80 countries

Starting with Australia in 1967, SMC has continued to move quickly into the international marketplace, steadily establishing local subsidiaries and distributors in approximately 500 locations in about 80 countries and regions around the world.

With the expansion of our international network, we have earned a solid reputation as a reliable international brand. Thanks to this network, we have been able to grow steadily and now hold the largest global market share (39%).

We will continue to view the world as a single market and further develop our sales organization in order to provide complete customer satisfaction.

Service Network in **The Americas**

The Americas Zone supports the needs of the regions' customers with more than 80 sales branches, 5 local production facilities. With this network, SMC is able to provide customer support for specials and application assistance as well as locally sourced assistance through the use of training kits and other materials.

Service Network in **Europe and Africa**

SMC products and services are available in 46 countries throughout Europe and Africa. This extensive sales network allows us to provide top-notch customer service while our production facility in the Czech Republic, our European Central Warehouse (ECW), and local subsidiaries that manufacture simple special-order products allow us to meet the demands of all of our customers in Europe. We also have a combined total of 180 engineers from various countries, including Japan, stationed at our European Technical Centre (ETC) in the UK and our German Technical Centre (GTC) in Germany working diligently on customers' projects. Communication within the centers is conducted smoothly in not only English but also other languages, thereby building solid business partnerships across Europe and Africa.

Corporate History

1959 ▶ Established in Chiyoda-ku, Tokyo, Japan under the name of Shoketsu Kinzoku Kogyo Co., Ltd. (Sintered Metal Corporation) with the business objective of the manufacture and sales of sintered metal filters by powder metallurgy.

The Aoto Factory completed.

1961 ▶ Started manufacture and sales of pneumatic air line equipment. (Air F.R.L. units)

1964 ▶ Manufacture and sales of automatic control equipment added to business objectives.

1967 ▶ Embarked on overseas operations with capital participation in SMC Pneumatics (Australia) Pty. Ltd. and incorporation into a wholly owned subsidiary in 1980.

1968 ▶ The Soka 1st Factory completed.

1970 ▶ Started manufacture and sales of actuators (air cylinders).

1971 ▶ Started manufacture and sales of directional control equipment (direct operated solenoid valves).

1973 ▶ The Soka 2nd Factory completed.

The Koshigaya Factory completed.

1974 ▶ SMC Pneumatics (S.E.A.) Pte. Ltd., a wholly owned subsidiary established in Singapore.

1977 ▶ SMC Corporation of America (changed name from SMC Pneumatics, Inc. in 2001), a wholly owned subsidiary established in the U.S.A.

1978 ▶ Head office relocated to Minato-ku, Tokyo.

SMC Pneumatics (U.K.) Ltd., a wholly owned subsidiary established in the U.K.

SMC Pneumatik GmbH, a wholly owned subsidiary established in Germany.

Completed the 2nd building of the Soka 1st Factory.

1981 ▶ Capital participation in SMC Italia S.p.A. in Italy and incorporation into a consolidated subsidiary.

1983 ▶ The Tsukuba Factory completed.

1986 ▶ Company name changed to SMC Corporation.

SMC Manufacturing (Singapore) Pte. Ltd., a wholly owned subsidiary established.

1987 ▶ Stocks listed on the second section of the Tokyo Stock Exchange.

1988 ▶ The Tsukuba 2nd Factory completed.

1989 ▶ Stocks listed on the first section of the Tokyo Stock Exchange.

1959

1970

1980

The Origin of the Company Name

Sintered Metal Company → **SMC**

SMC started its business by manufacturing the elements for industrial filters from sintered metal filtrate materials, by employment of the powder-metallurgy method, and had formally been called the Shoketsu Kinzoku Kogyo Co. Ltd. However, due to the decrease in the sales ratio of sintered metal filtrate materials, and also for the purpose of making a fresh new change to the corporate image by launching onto the Stock Exchange list, on the first of April 1986 we therefore decided to employ the name "SMC," which was already being used as the international brand name, as the unified company name for both domestic Japan and international use.

We attentively listen to the information and requests received from our customers.

We use the information to tailor our products to better meet the needs of our customers.

We continue the cycle of listening to our customers and further refining our products.

The three lines symbolize our attitude towards mutual communication.

CSR activities to achieve corporate social responsibility

SMC is aware that a corporation is nothing without the trust of its customers, clients, shareholders, investors, employees, and community, which is why SMC makes achieving social responsibility (CSR) a top priority. In order to maintain that trust, the SMC Group Code of Conduct was implemented as a guideline for all executives and employees to follow.

The production department's main energy-saving measures

SMC's factory environment and energy-saving initiatives date back to 1998, starting with the implementation of systematic activities in response to the introduction of the ISO 14001 environmental management standards.

These initiatives include product assessment, energy and resource conservation, chemical use reduction, and the implementation of the 5S methodology, and are developed at a corporate level.

SMC is a strong supporter of the Sustainable Development Goals (SDGs).
