

ORIGINAL INSTRUCTIONS

Instruction Manual Wireless System PROFINET compatible Series EX600-WPN# / EX600-WSV#

The intended use of this product is to provide a connection from the PROFINET communication protocol to a pneumatic valve manifold or I/O system via wireless communication.

1 Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC) ^{*1}, and other safety regulations.

- ⁽¹⁾ ISO 4414: Pneumatic fluid power General rules relating to systems. ISO 4413: Hydraulic fluid power - General rules relating to systems. IEC 60204-1: Safety of machinery - Electrical equipment of machines. (Part 1: General requirements)
- ISO 10218-1: Manipulating industrial robots -Safety. etc. • Refer to product catalogue, Operation Manual and Handling
- Precautions for SMC Products for additional information.

• Keep this manual in a safe place for future reference.

A Caution	Caution indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.	
A Warning	Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.	
🛕 Danger	Danger indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.	
A		

Warning

• Always ensure compliance with relevant safety laws and standards.

All work must be carried out in a safe manner by a qualified person in compliance with applicable national regulations.

2 Specifications

2.1 Base specifications (EX600-WPN#)

Models			EX600-WPN1	EX600-WPN2
	Communication protocol		PROFINET IO

*1: Varies depending on the wireless communication status and the surrounding environment.

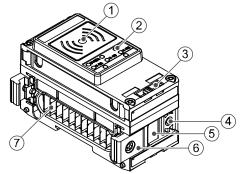

*2: Austria, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, U.K., Turkey. (as of March 2018).

*3: The NFC communication RFID tag of the 13.56 MHz passive type.

No.	Item	Description
1	NFC antenna area	This area is for close contact with the NFC reader/writer. "O" marks the centre of the NFC antenna.
2	Status indication LED	LED display to indicate the unit status.
3	Connector (PORT-1)	Fieldbus input / output connection.
4	Connector (PORT-2)	Fieldbus input / output connection.
5	Marker groove	Marker (EX600-ZT1) can be mounted.
6	Valve plate mounting	Screw hole for mounting the valve plate.
7	Valve plate mounting groove	Groove to insert the valve plate.
8	Joint bracket	Bracket for mounting adjacent units.
9	Unit connector (plug)	Connector to transfer signals and power to the next unit.
10	Seal cap (1 pc.)	To be mounted on unused connectors (PORT 1 or 2).

• Remote module (EX600-WSV#)

4 Installation

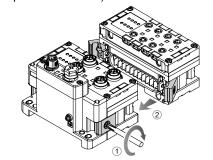

4.1 Installation

M Warning

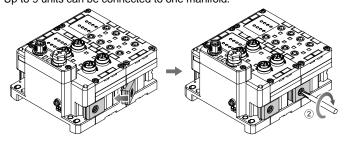

• Do not install the product unless the safety instructions have been read and understood.

· Assembling the unit as a manifold

(1) Connect a unit to the end plate. Digital and analogue units can be connected in any order. (Tightening torque: 1.5 to 1.6 N•m)

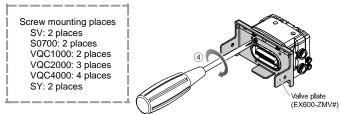

(2) Add more units. Up to 9 units can be connected to one manifold.

(3) Connecting the wireless unit After connecting the required I/O units, connect the wireless unit.

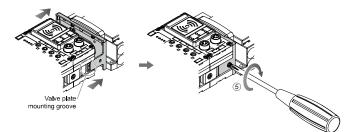

The connection method is as above.

(4) Mounting the valve plate. (Valve manifold not connected) Mount the valve plate (EX600-ZMV*) to the valve manifold using the set screws (M3 x 8) provided with the product. (Tightening torque: 0.6 to 0.7 N•m)

(5) Connect the wireless unit to the valve manifold.

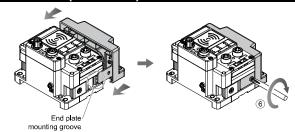

Insert the valve plate into the valve plate mounting groove on the side of the wireless unit, and then fix both surfaces of the plate using the valve plate mounting screws (M4 x 6) provided with the product. (Tightening torque: 0.7 to 0.8 N•m)

(6) When valve manifold is not connected.

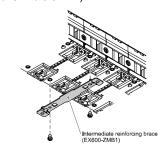

Insert the end plate (EX600-EU1) into the valve plate mounting groove on the side of the wireless unit, and then fix both surfaces of the plate using the valve plate mounting screws (M4 x 6) provided with the product. (Tightening torque: 0.7 to 0.8 N•m)

4 Installation (continued)

• Direct mounting

(1) When joining six or more units, fix the middle part of the complete EX600 unit with an intermediate reinforcing brace (EX600-ZMB1) before mounting, using 2-M4 x 5 screws. (Tightening torque: 0.7 to 0.8 N•m)

(2) Mount and tighten the end plate and the valve manifold (intermediate reinforcing brace if necessary) at one end of the unit. (M4) (Tightening torque: 0.7 to 0.8 N•m)

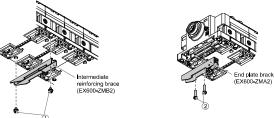

Refer to the Operation Manual of the applicable valve manifold for the mounting method of the valve side.

· DIN rail mounting

(1) When joining six or more units, fix the middle part of the complete EX600 unit with an intermediate reinforcing brace (EX600-ZMB2) for DIN rail before mounting, using 2-M4 x 6 screws. (Tightening torque: 0.7 to 0.8 N•m)

(2) Mount the end plate bracket (EX600-ZMA2) to the end plate using 2-M4 x 14 screws.

(Tightening torque: 0.7 to 0.8 N•m) For the SY series, use the end plate bracket (EX600-ZMA3).

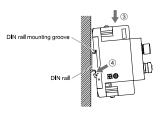

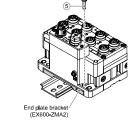

(3) Hook the DIN rail mounting groove on to the DIN rail.

(4) Press the manifold using its side hooked to the DIN rail as a fulcrum

M4 x 20 screws provided with the product. (Tightening torque: 0.7 to 0.8 N•m)

SMC website (URL: https://www.smcworld.com) for the mounting method of the valve side.

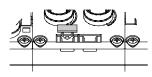

4 Installation (continued)

· Mounting the marker

The signal name of the input or output devices and unit address can be written on the marker and can be installed on each unit. Mount the marker (EX600-ZT1) into the marker groove as required.

4.2 Wiring connections

· Connector (Base only)

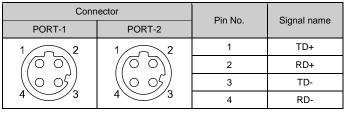

This system is operated using power supplied from the EX600-ED# end plate. Refer to the end plate details for the power supply connection.

The base is connected to the upper level communication (PROFINET). The connection has 2 ports, PORT-1 and PORT-2, and both ports can connect to Ethernet

The PROFINET topology corresponds to star, line, tree and ring.

4.3 Environment

Warning

- Do not use in an environment where corrosive gases, chemicals, salt water or steam are present.
- Do not use in an explosive atmosphere.
- Do not expose to direct sunlight. Use a suitable protective cover.
- · Do not install in a location subject to vibration or impact in excess of the product's specifications.
- Do not mount in a location exposed to radiant heat that would result in temperatures in excess of the product's specifications.

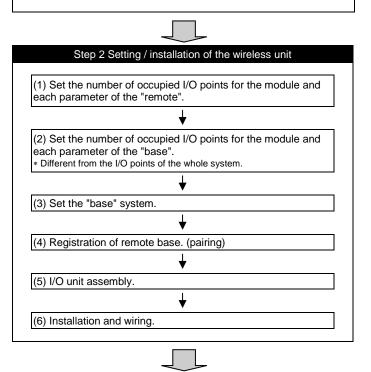

5 Settings

· Flow chart for using the wireless system

Step 1 Preparation before use (PC, Application

(1) Install the NFC reader/ writer and drivers.

(2) Install the I/O Configurator for NFC.

Step 3 Connection to PLC

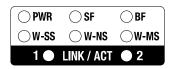

Note) Refer to the operation manual of the PLC manufacturer for connection to a PLC and Configurator.

With the above settings, it is possible to control the upper level controller

Refer to the I/O Configurator for NFC operation manual and I/O Configurator (Web) operation manual on the SMC website (URL: https://www.smcworld.com) for details of the I/O Configurator.

6 LED Display

8 Outline Dimensions (mm)

Refer to the Operation manual or catalogue on the SMC website (URL: <u>https://www.smcworld.com</u>) for Outline dimensions.

9 Maintenance

9.1 General Maintenance

Caution

- Not following proper maintenance procedures could cause the product to malfunction and lead to equipment damage.
- If handled improperly, compressed air can be dangerous.
- Maintenance of pneumatic systems should be performed only by qualified personnel.
- Before performing maintenance, turn off the power supply and be sure to cut off the supply pressure. Confirm that the air is released to atmosphere.
- After installation and maintenance, apply operating pressure and power to the equipment and perform appropriate functional and leakage tests to make sure the equipment is installed correctly.
- If any electrical connections are disturbed during maintenance, ensure they are reconnected correctly and safety checks are carried out as required to ensure continued compliance with applicable national regulations.
- Do not make any modification to the product.
- Do not disassemble the product, unless required by installation or maintenance instructions.

• Influence of radio frequency on implantable medical devices: The radio frequency generated by this product may give an adverse effect on implantable medical devices, such as implantable cardiac pacemakers and implantable cardioverter defibrillators. Please read catalogues or instruction manuals of the equipment and device which may be affected by radio frequencies for any instructions for use or contact their manufacturers.

10 Limitations of Use

10.1 Limited warranty and Disclaimer/Compliance Requirements Refer to Handling Precautions for SMC Products.

11 Product Disposal

This product shall not be disposed of as municipal waste. Check your local regulations and guidelines to dispose of this product correctly, in order to reduce the impact on human health and the environment.

12 Contacts

Refer to <u>www.smcworld.com</u> or <u>www.smc.eu</u> for your local distributor / importer.
