

Installation & Maintenance Manual

DeviceNet Direct input type

Step Motor Controller (Servo 24 VDC)

Series JXCD1

1 Safety Instructions

This manual contains essential information for the protection of users and others from possible injury and/or equipment damage.

- Read this manual before using the product, to ensure correct handling, and read the manuals of related apparatus before use.
- Keep this manual in a safe place for future reference.
- These instructions indicate the level of potential hazard by label of "Caution", "Warning" or "Danger", followed by important safety information which must be carefully followed.
- To ensure safety of personnel and equipment the safety instructions in this manual and the product catalogue must be observed, along with other relevant safety practices.

	Caution	CAUTION indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.
	Warning	WARNING indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.
	Danger	DANGER indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

This product is class A equipment that is intended for use in an industrial environment.

There may be potential difficulties in ensuring electromagnetic compatibility in other environments due to conducted as well as radiated disturbances.

Warning

- The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.**
Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results.
The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product.
This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.
- Only personnel with appropriate training should operate machinery and equipment.**
The product may become unsafe if handled incorrectly.
The assembly, operation and maintenance of machines or equipment must be performed by an operator who is appropriately trained and experienced.
- Do not attempt to service or replace product and machinery/equipment until safety is confirmed.**
 1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
 2. When the product is to be removed, confirm that the above safety measures are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
 3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

1 Safety Instructions (Continued)

Warning

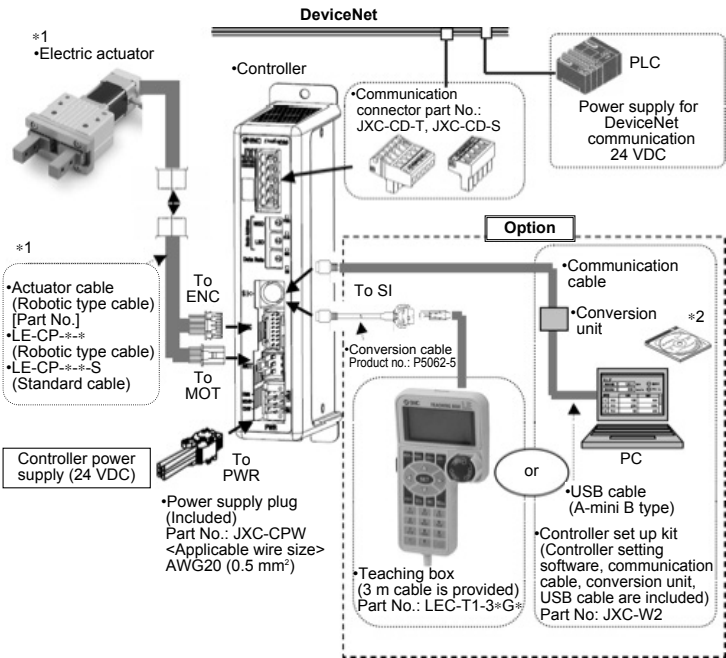

- Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions:**
 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
 3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

Caution

- The product is provided for use in manufacturing industries.**
The product herein described is basically provided for peaceful use in manufacturing industries.
If considering using the product in other industries, consult SMC beforehand and provide specifications or a contract, if necessary.
If anything is unclear, contact your nearest sales branch.

Refer to the operation manual on the SMC website
(URL <http://www.smcworld.com>).

2 Product configuration

*1 These items are included when ordered using the part number for an actuator set.
*2 The latest version of the controller setting software must be used.
Upgrade software can be downloaded from SMC website.
<http://www.smcworld.com/>

Warning

The Communication cable must be connected to a PC using a USB cable through a conversion unit.
Do not connect the teaching box to a PC, as this may cause damage to the personal computer.

3 Parts Description

Detail of the controller parts.

			
No.	Display	Name	Details
1	-	Display	LED's to indicate the controller status.
2	-	DeviceNet communication connector	Connect to the DeviceNet communication line.
3	Node Address	Switch for node address setting	Switches to set the DeviceNet communication node address (0 to 63) by X1 (LSD) and X10 (MSD).
4	Data Rate	Switch for communication speed setting	Switch to set the DeviceNet communication speed (125, 250, 500 kbps).
5	SI	Serial I/O connector (8 poles)	Connector for the teaching box (LEC-T1) or the setting software (LEC-W2).
6	ENC	Encoder connector (16 poles)	Connect to the actuator cable.
7	MOT	Motor driving connector (6 poles)	
8	PWR	Power supply connector (5 poles)	Connect to the controller power supply (24 VDC) using the power supply plug. Control power (+), Stop signal (+), Motor power (+), Lock release (+), Common power (-)
9	-	Controller part number label	Label indicating the controller part number.
10	-	Applicable actuator part number label	Label indicating the actuator part number which can be connected to the controller.
11	-	FE	Functional Ground When the controller is mounted, tighten screws and connect the grounding cable.

4 LED display

LED		Details	
PWR	Power supply status.	OFF	Power is not supplied
		Green LED is ON	Power is supplied
ALM	Controller alarm status.	OFF	Normal operation
		Red LED is ON	Alarm generated
MS	Controller status.	OFF	The controller operating voltage is not supplied.
		Green LED is ON	Operating normally
		Red LED is flashing	Recoverable internal error Rotary switches for node address and communication speed were changed after establishing communication.
NS	DeviceNet communication status.	OFF	The controller operating voltage is not supplied or IP address is not set.
		Green LED is ON	DeviceNet communications established.
		Green LED is flashing	DeviceNet communications not established.
		Red LED is flashing	DeviceNet connection time out
		Red LED is ON	Node address duplicated, or communication error

LED and Controller Status

Controller status		LED description			
		PWR	ALM	MS	NS
When power is supplied		Green LED is ON	LED is OFF	-	-
When DeviceNet communication is normal		-	-	Green LED is ON	Green LED is ON
Motor controller	Controller alarm generated	LED is OFF	Red LED is ON	-	-
	Controller system error generated	Green LED is ON	Red LED is ON	-	-
	Writing to controller EEPROM	Green LED is flashing	-	-	-

Caution

Do not turn OFF the power supply for the controller or disconnect and connect the cable while data is being written to EEPROM (PWR LED (green) is flashing).

* This is to avoid the possibility of incorrect/corrupt data (step data, parameter)

5 Specifications

Basic specifications

Item	Specifications	
Compatible motor	Step motor (servo 24 VDC)	
Power supply	Power supply voltage: 24 VDC±10%	
Current consumption	100 mA or less (Controller) Refer to the specification of actuator to be connected for total power consumption.	
Compatible encoder	Incremental A/B phase (800 pulse/rotation)	
Memory	EEPROM	
LED display	LED	Details
	PWR	Power supply
	ALM	Alarm status
	MS	Controller status
	NS	Communication status
Locking	With unlocking terminal	
Cable length	Actuator cable: 20 m or less	
Cooling method	Air-cooling type	
Operating temperature range	0°C to 40°C (No freezing)	
Operating humidity range	90% RH or less (No condensation)	
Insulation resistance	Between the external terminals and case 50 MΩ (500 VDC)	
Weight	210 g (Direct mounting type) 230 g (DIN rail mounting type)	

DeviceNet communication

Item	Specifications
Protocol	DeviceNet (Conformance test version CT-27) Volume1: Common Industrial Protocol(CIP) Edition3.14 Volume3: DeviceNet Adaption of CIP Edition 1.13
Node address	0 to 63 Node address information is maintained even when the power supply is disconnected, when it has been set either by rotary switch or via communication network.
Communication speed (Data Rate)	125/250/500 kbps Communication speed information is maintained even when the power supply is disconnected, when it has been set either by rotary switch or via communication network.
Slave type	Group 2 Only Server
Setup file	EDS file (Download from SMC website).
Number of bytes received	4, 12, 20, 36 bytes (Default setting is 4 bytes)
Number of bytes sent	4, 10, 20 bytes (Default setting is 4 bytes)
Vendor ID	07h (SMC Corporation)
Product type	43h (Generic Device)
Product code	DDh
Corresponding messages	Polled I/O message Explicit message

6 Mounting

(1) Mounting

The controller can be direct mounted using screws or mounted on a DIN rail.
Details of the controller mounting options are shown below.

[1] Direct mounting (JXCD17*-*)
(Mounting with two M4 screws)

[2] DIN rail mounting (JXCD18*-*)
(Mounting with DIN rail)

Before locked onto DIN rail Locked onto DIN rail

(2) Grounding

Place the grounding cable with crimped terminal between the M4 screw and shakeproof washer as shown below and tighten the screw.

Caution

The M4 screw, cable with crimped terminal and shakeproof washer must be prepared by the user.
The controller must be connected to Ground to reduce noise.

Refer to the operation manual on SMC website
(URL <http://www.smcworld.com>).

7 Power Supply Plug

Power supply plug specifications

The specifications of the power supply plug supplied with the controller are shown below.

Terminal	Function	Description
0V	Common power (-)	The negative common power for M24V, C24V, EMG and LK RLS.
M24V	Motor power (+)	The positive power for the actuator motor to be supplied via the controller.
C24V	Power supply (+)	The positive control power.
EMG	Stop (+)	The positive power for Stop signal
LK RLS	Unlocking (+)	The positive power for lock release.

* Equivalent to Phoenix Contact: DFMC1, 5/3-ST-LR

8 Initial Setting

Setting method by the setting switch

The node address and communication speed of the DeviceNet communication are set with the setting switches.
The node address is set according to the combination of the MSD and LSD setting switches.
The communication speed is set with the Data Rate setting switch.

Communication speed setting

Data Rate	Communication speed
0	125 kbps (Default setting)
1	250 kbps
2	500 kbps
3	
:	PGM *1
9	

Node address setting

Node Address		Node address
MSD (X10)	LSD (X1)	
0	0	0 *2
0	1	1 (Default setting)
0	2	2
:	:	:
6	2	62
6	3	63
6	4	PGM *1
:	:	
9	9	

*1 When PGM is set, the setting is performed via the DeviceNet network.

*2 The default node address is "01" and the default communication speed is "0".
