Air Cylinder

Ø 32, Ø 40, Ø 50, Ø 63, Ø 80, Ø 100, Ø 125

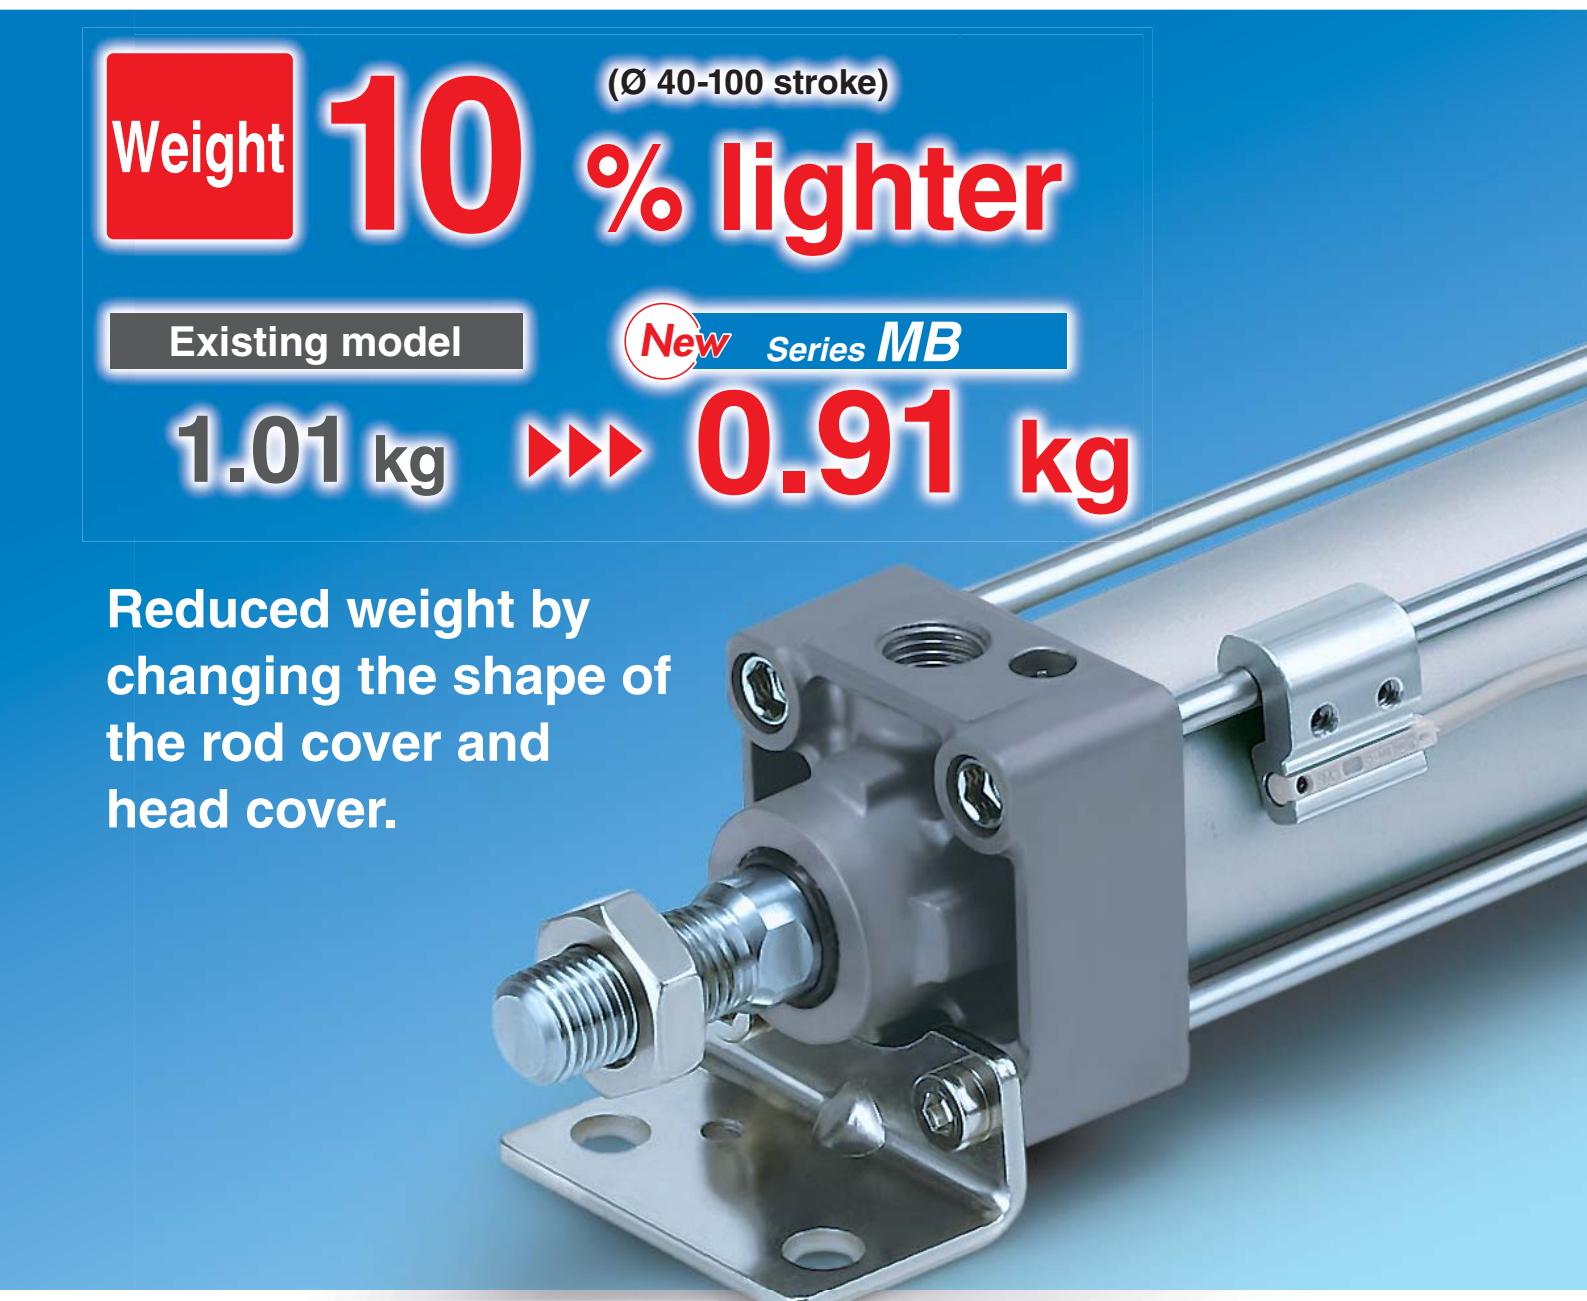
New

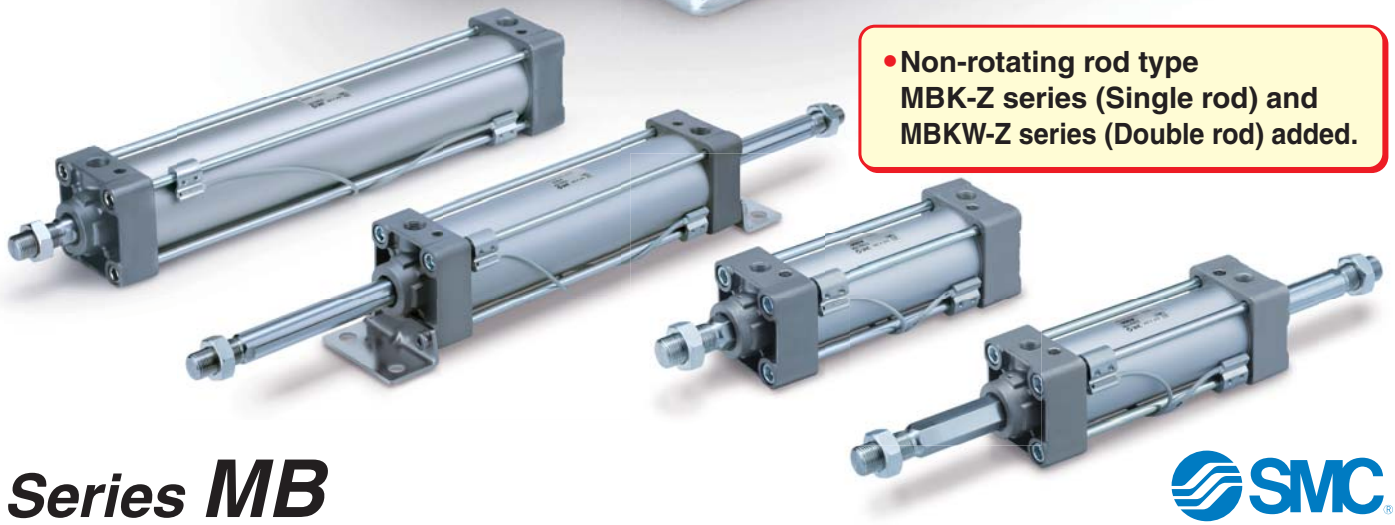
RoHS

Weight 10 % lighter (Ø 40-100 stroke)

Existing model 1.01 kg ▶▶▶ New Series MB 0.91 kg

Reduced weight by changing the shape of the rod cover and head cover.





- Non-rotating rod type
  MBK-Z series (Single rod) and
  MBKW-Z series (Double rod) added.

Series MB

SMC

CAT.EUS20-231D-UK

Part numbers with rod end bracket and/or pivot bracket available

Not necessary to order a bracket for the applicable cylinder separately

Note) Mounting bracket is shipped together with the product, but not assembled.

Example) MDB D -40-100Z- N V -M9BW

Mounting style

Pivot bracket	
—	No bracket
N	Pivot bracket is shipped together with the product, but not assembled.

* Applicable to only D (Double clevis) and T (Centre trunnion) mounting styles.

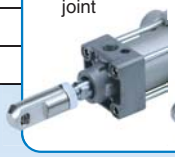
Double clevis

Centre trunnion

Rod end bracket	
—	No bracket
V	Single knuckle joint
W	Double knuckle joint

With rod end bracket

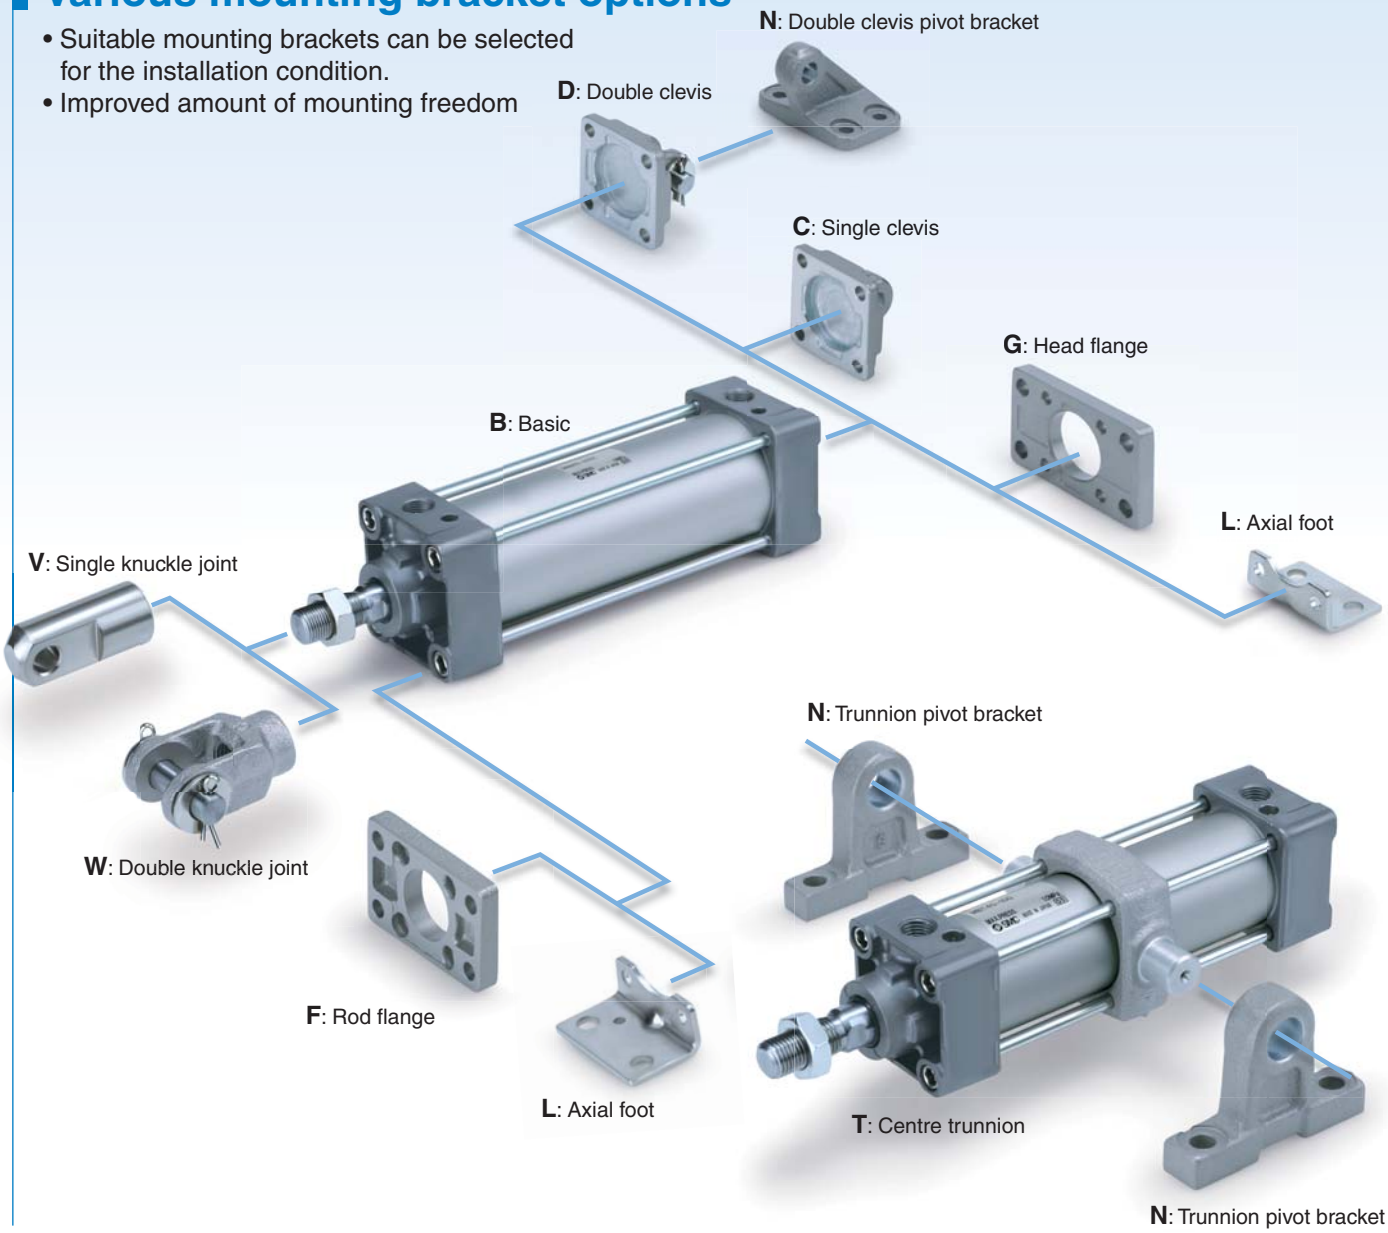
V: Single knuckle joint



W: Double knuckle joint

Various mounting bracket options

- Suitable mounting brackets can be selected for the installation condition.
- Improved amount of mounting freedom



Lightweight

Reduced weight by changing the shape of the rod cover and head cover.

[kg]

Bore size [mm]	MB	Reduction rate [%]	Current model
32	0.66	8	0.72
40	0.91	10	1.01
50	1.56	9	1.71
63	1.83	9	2.01
80	3.25	9	3.57
100	4.48	7	4.82
125	6.90	0	6.90

∗ At 100 stroke

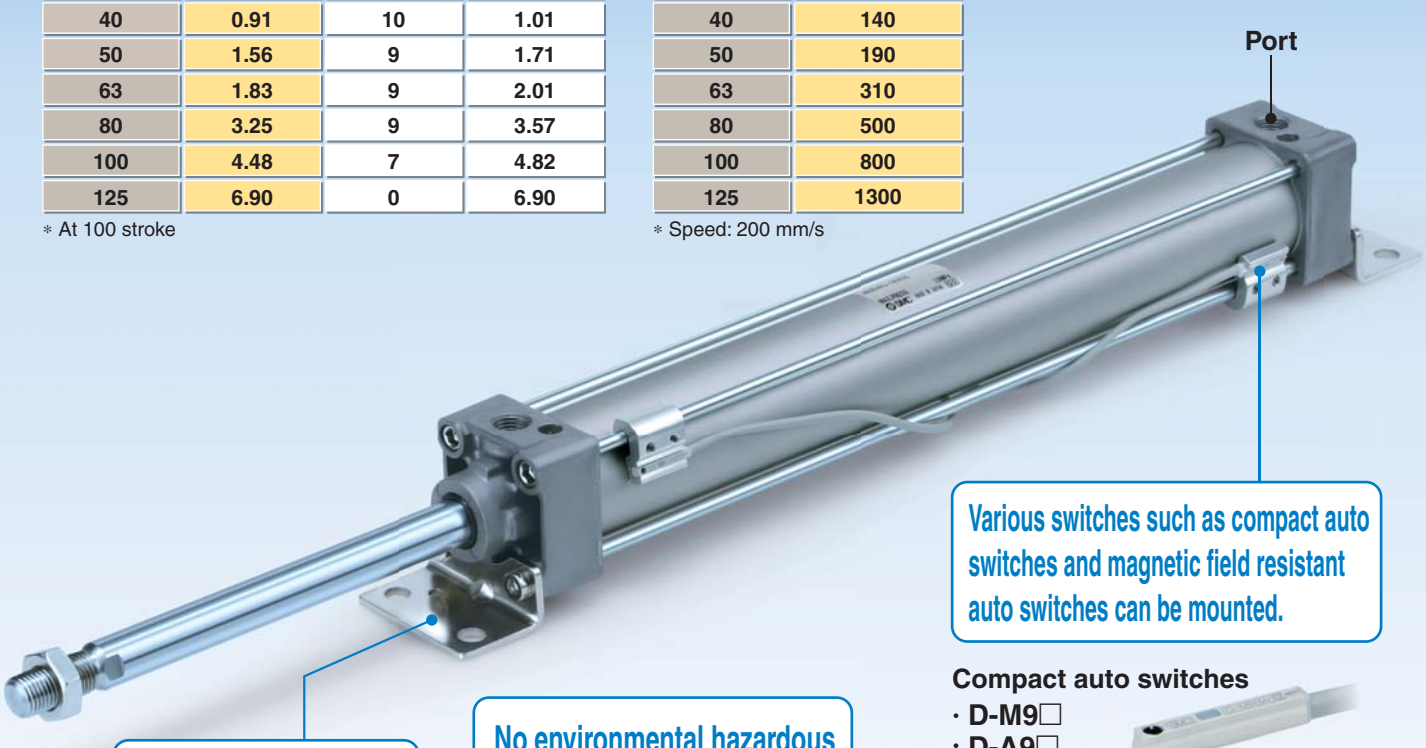
Applicable speed/load

- Piston speed: Max. **1000** mm/s (Ø 32 to Ø 125)
- Load yield: See table below.

[kg]

Bore size [mm]	Maximum load mass
32	80
40	140
50	190
63	310
80	500
100	800
125	1300

∗ Speed: 200 mm/s



Various switches such as compact auto switches and magnetic field resistant auto switches can be mounted.

Compact auto switches
- D-M9□
- D-A9□

Magnetic field resistant auto switches
- D-P3DWA
- D-P4DW

Mounting dimensions are the same as the current product.

No environmental hazardous substances used

Lead free bushing is used as sliding material. Compliant with EU RoHS directive.

TF	G

Cylinder stroke [mm]
Refer to "Standard Strokes" on page 6.

Suffix (Rod boot)

—	None
J	Nylon tarpaulin
K	Heat resistant tarpaulin

Suffix (Cushion)

—	Air cushion
N∗	Rubber bumper

∗ Since the bumpers are attached to the both sides of the piston for rubber bumper type, the overall length is longer than the cylinder with air cushion as follows: Ø 32, Ø 40: +6 mm, Ø 50, Ø 63: +8 mm, Ø 80, Ø 100: +10 mm, Ø 125: +12 mm.

Accessories 1

—	No bracket
N	Pivot bracket

∗ Only for D and T mounting styles.
∗ Pivot bracket is shipped together with the product.
∗ For details, refer to page 13.

Accessories 2

—	No bracket
V	Single knuckle joint
W	Double knuckle joint

∗ A knuckle joint pin is not provided with the single knuckle joint.
∗ Rod end bracket is shipped together with the product.

Auto switch

—	Without auto switch

∗ For applicable auto switches, refer to the table below.

Number of auto switches

—	2 pcs.
S	1 pc.
3	3 pcs.
n	"n" pcs.

Made to Order
For details, refer to page 6.

∗ **Refer to "Ordering Example of Cylinder Assembly" on page 6.**

Applicable Auto Switches/Refer to the auto switch guide for further information on auto switches.

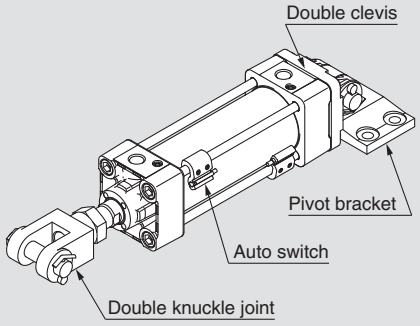
Note 1) Manufacture of intermediate strokes is possible. (Spacers are not used.)
Note 2) Applicable strokes should be confirmed according to the usage. For details, refer to "Air Cylinders Model Selection" in our website **www.smc.eu**. In addition, the products that exceed the stroke range ① might not be able to fulfill the specifications due to the deflection etc.
Note 3) Please consult with SMC for manufacturability and the part numbers when exceeding the stroke range ②.
Note 4) The stroke range with rod boot is up to 1000 mm. Please consult with SMC when exceeding 1000 mm strokes.

Ordering Example of Cylinder Assembly

Cylinder model: MDBD32-50Z-NW-M9BW



Mounting D: Double clevis
Pivot bracket N: Yes
Rod end bracket W: Double knuckle joint
Auto switch D-M9BW: 2 pcs.

∗ Pivot bracket, double knuckle joint and auto switch are shipped together with the product, but not assembled.

Refer to pages 38 to 45 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range

Made to Order

Made to Order
(For details, refer to pages 47 to 63.)

Symbol	Specifications
-XA□	Change of rod end shape

Note) Theoretical force [N] = Pressure [MPa] x Piston area [mm²]

Weights

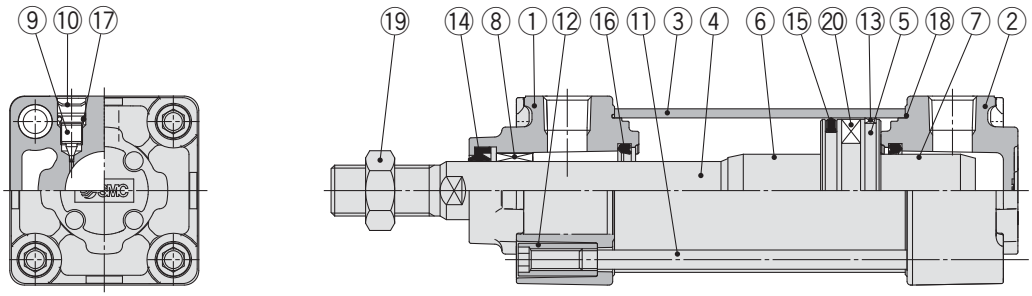
[kg]

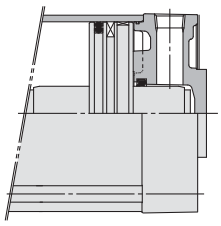
Bore size [mm]		32	40	50	63	80	100	125
Basic weight	Basic	0.44	0.59	1.04	1.29	2.41	3.36	5.48
	Axial foot	0.56	0.73	1.26	1.57	2.91	4.02	7.56
	Rod/Head flange	0.73	0.96	1.49	2.08	3.86	6.67	9.64
	Single clevis	0.69	0.82	1.38	1.92	3.52	6.53	8.05
	Double clevis	0.7	0.86	1.47	2.08	3.81	7.05	8.25
	Centre trunnion	0.73	0.95	1.52	2.09	3.96	7.03	8.46
Additional weight per 50 mm of stroke	All mounting brackets	0.11	0.16	0.26	0.27	0.42	0.56	0.71
Accessories	Single knuckle joint	0.15	0.23	0.26	0.26	0.60	0.83	1.08
	Double knuckle joint (with pin)	0.22	0.37	0.43	0.43	0.87	1.27	1.58

Calculation
Example) **MBB32-100Z** (Basic, Ø 32, 100 stroke)
- Basic weight ·····0.44 (Basic, Ø 32)
- Additional weight ·····0.11/50 stroke
- Cylinder stroke·····100 stroke

0.44 + 0.11 x 100/50 = **0.66 kg**

Construction





MB125

Replacement Parts/Seal Kit

Bore size [mm]	Kit no.	Contents
32	MB32Z–PS	Set of the nos. ⑭, ⑮, ⑯, ⑱
40	CA2–40Z–PS	
50	CA2–50Z–PS	
63	CA2–63Z–PS	
80	CA2–80Z–PS	
100	CA2-100Z–PS	
125	MB125–PS	

∗ Seal kits consist of items ⑭, ⑮, ⑯, ⑱, and can be ordered by using the seal kit number corresponding to each bore size.
∗ Centre trunnion type should not be disassembled. (Refer to page 64.)
∗ The seal kit includes a grease pack (10 g for Ø 32 to Ø 50, 20 g for Ø 63 and Ø 80, 30 g for Ø 100 and Ø 125).
Order with the following part number when only the grease pack is needed.
Grease pack part number: GR-S-010 (10 g), **GR-S-020** (20 g)

Water Resistant Air Cylinder

Water resistant air cylinders are also available in the MB series, which are suitable for use on machine tools, where exposure to coolant is possible and applicable for food machinery and automobile washing equipment in an environment where water splashes. Please refer to the catalogue in our website **www.smc.eu**.

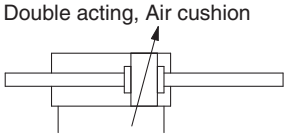
∗1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Please contact SMC regarding water resistant types with the above model numbers.

∗ Lead wire length symbols: 0.5 m····· — (Example) M9NW
1 m····· M (Example) M9NWM
3 m····· L (Example) M9NWL
5 m····· Z (Example) M9NWZ

∗ Solid state auto switches marked with "○" are produced upon receipt of order.
∗ Since there are other applicable auto switches than listed above, refer to page 45 for details.
∗ For details about auto switches with pre-wired connector, refer to the auto switch guide.
For the D-P3DWA□, refer to the auto switch guide.
∗ The D-A9□/M9□□□/P3DWA□ auto switches are shipped together, (but not assembled). (However, auto switch mounting brackets are assembled for the D-A9□/M9□□□ before shipment.)
∗∗∗ The D-P3DWA cannot be mounted on Ø 32. Use the D-P3DW.

Symbol
Double acting, Air cushion



Made to Order

(For details, refer to pages 47 to 63.)

Symbol	Specifications
-XA□	Change of rod end shape
-XB6	Heat resistant cylinder (-10 to 150 °C)
-XC3	Special port location*1 *2
-XC4	With heavy duty scraper
-XC5	Heat resistant cylinder (-10 to 110 °C)
-XC7	Tie-rod, cushion valve, tie-rod nut, etc. made of stainless steel
-XC14	Change of trunnion bracket mounting position
-XC22	Fluororubber seal
-XC30	Rod trunnion
-XC35	With coil scraper
-XC68	Made of stainless steel (with hard chrome plated piston rod)*3
-XC88	Spatter resistant coil scraper, Lube-retainer, Grease for welding (Piston rod: Stainless steel 304)
-XC89	Spatter resistant coil scraper, Lube-retainer, Grease for welding (Piston rod: S45C)
-XC91	Spatter resistant coil scraper, Grease for welding (Piston rod: S45C)

∗1 The cover shape is the same as the current product.
∗2 Ø 125 only
∗3 Except Ø 125

For special port location (-XC3), the mounting bracket and port location can be determined using the standard product corresponding to the operating conditions. Also, this is only applicable to -XC3BB, -XC3CC and -XC3DD with trunnion bracket.

For parts made of stainless steel (-XC6), use the same specification stainless steel with the surface treatment (with hard chrome plated piston rod) (-XC68).

Refer to pages 38 to 45 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range

Water Resistant Air Cylinder

Water resistant air cylinders are also available in the MB series, which are suitable for use on machine tools in an atmosphere with coolant and applicable to food machinery and automobile washing equipment in an environment with water splashes. Please refer to the catalogue in our website **www.smc.eu** for more information.

Specifications

Bore size [mm]	32	40	50	63	80	100	125
Action	Double acting, Double rod						
Fluid	Air						
Proof pressure	1.5 MPa						
Max. operating pressure	1.0 MPa						
Min. operating pressure	0.05 MPa						
Ambient and fluid temperature	Without auto switch: -10 to 70 °C With auto switch: -10 to 60 °C (No freezing)						
Lubrication	Not required (Non-lube)						
Operating piston speed	50 to 1000 mm/s						50 to 700 mm/s
Allowable stroke tolerance	Up to 250: $^{+1.0}_{0}$, 251 to 1000: $^{+1.4}_{0}$, 1001 to 1500						
Cushion Note)	Air cushion or Rubber bumper						
Port size (Rc, NPT, G)	1/8	1/4		3/8		1/2	
Mounting	Basic, Axial foot, Rod flange, Centre trunnion						

Note) Kinetic energy absorbable by the cushion mechanism is identical to double acting, single rod.

Standard Strokes

[mm]

Bore size	Standard stroke		Max. manufacturable stroke
	Stroke range ①	Stroke range ②	
32	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500	Up to 1000	Up to 1800

50	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600	Up to 1200	
63	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600		
80	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800	Up to 1500	
100	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800		
125	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800, 900, 1000		

Note 1) Manufacture of intermediate strokes is possible. (Spacers are not used.)
Note 2) Applicable strokes should be confirmed according to the usage. For details, refer to "Air Cylinders Model Selection" in our website **www.smc.eu**. In addition, the products that exceed the stroke range ① might not be able to fulfill the specifications due to the deflection etc.
Note 3) Please consult with SMC for manufacturability and the part numbers when exceeding the stroke range ②.
Note 4) The stroke range with rod boot is up to 1000 mm. Please consult with SMC when exceeding 1000 mm strokes.

Replacement Parts/Seal Kit

Bore size [mm]	Kit no.	Contents
32	MBW32Z–PS	Set of the nos. ⑪, ⑫, ⑬, ⑮
40	CA2W40Z–PS	
50	CA2W50Z–PS	
63	CA2W63Z–PS	
80	CA2W80Z–PS	
100	CA2W100Z–PS	
125	MBW125–PS	

∗ Seal kits consist of items ⑪, ⑫, ⑬, ⑮, and can be ordered by using the seal kit number corresponding to each bore size.
∗ Trunnion type should not be disassembled. (Refer to page 64.)
∗ The seal kit includes a grease pack (10 g for Ø 32 to Ø 50, 20 g for Ø 63 and Ø 80, 30 g for Ø 100 and Ø 125).
Order with the following part number when only the grease pack is needed.
Grease pack part number: GR-S-010 (10 g), **GR-S-020** (20 g)

Cylinder stroke [mm]
Refer to "Standard Strokes" on page 22.

Suffix (Rod boot)

—	None
J	Nylon tarpaulin
K	Heat resistant tarpaulin

Suffix (Cushion)

—	Air cushion
N∗	Rubber bumper

∗ Since the bumpers are attached to the both sides of the piston for rubber bumper type, the overall length is longer than the cylinder with air cushion as follows: Ø 32, Ø 40: +6 mm, Ø 50, Ø 63: +8 mm, Ø 80, Ø 100: +10 mm.

Accessories 1

—	No bracket
N	Pivot bracket

∗ Only for D and T mounting styles.
∗ Pivot bracket is shipped together with the product.
∗ For details, refer to page 13.

Auto switch

—	Without auto switch

∗ For applicable auto switches, refer to the table below.

Number of auto switches

—	2 pcs.
S	1 pc.
3	3 pcs.
n	"n" pcs.

Made to Order
For details, refer to page 22.

Accessories 2

—	No bracket
V	Single knuckle joint
W	Double knuckle joint

∗ A knuckle joint pin is not provided with the single knuckle joint.
∗ Rod end bracket is shipped together with the product.
∗ The screw-in amount of the piston rod end cannot be adjusted when a clevis bracket, trunnion bracket and knuckle joint are used together.

Applicable Auto Switches/Refer to the auto switch guide for further information on auto switches.

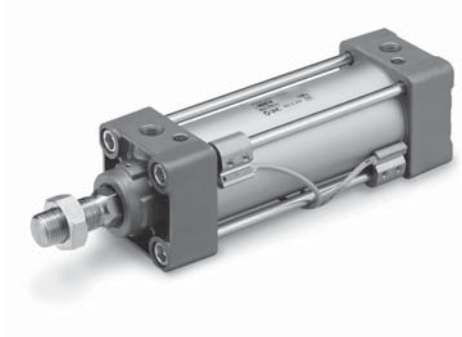
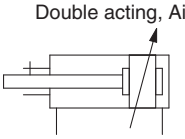
∗1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. A water resistant type cylinder is recommended for use in an environment which requires water resistance.

∗ Lead wire length symbols: 0.5 m ····· — (Example) M9NW; 1 m ····· M (Example) M9NWM; 3 m ····· L (Example) M9NWL; 5 m ····· Z (Example) M9NWZ

∗ Solid state auto switches marked with "○" are produced upon receipt of order.
∗ Since there are other applicable auto switches than listed above, refer to page 45 for details.
∗ For details about auto switches with pre-wired connector,refer to the auto switch guide. For the D-P3DWA□, refer to the auto switch guide.
∗ The D-A9□/M9□□□/P3DWA□ auto switches are shipped together, (but not assembled). (However, auto switch mounting brackets are assembled for the D-A9□/M9□□□ before shipment.)
∗∗∗ The D-P3DWA cannot be mounted on Ø 32. Use the D-P3DW.



Symbol
Double acting, Air cushion



Specifications

Bore size [mm]	32	40	50	63	80	100
Action	Double acting, Single rod					
Fluid	Air					
Proof pressure	1.5 MPa					
Maximum operating pressure	1.0 MPa					
Minimum operating pressure	0.05 MPa					
Ambient and fluid temperature	Without auto switch: -10 to 70 °C With auto switch: -10 to 60 °C (No freezing)					
Lubricant	Non-lube					
Piston speed	50 to 1000 mm/s					
Stroke length tolerance	Up to 250: $^{+1.0}_{0}$, 251 to 1000: $^{+1.4}_{0}$, 1001 to 1500: $^{+1.8}_{0}$					
Cushion Note)	Air cushion or Rubber bumper					
Port size (Rc, NPT, G)	1/8	1/4		3/8		1/2
Mounting	Basic, Axial foot, Rod flange, Head flange, Single clevis, Double clevis, Centre trunnion					
Non-rotating accuracy	±0.5°		±0.5°		±0.3°	
Allowable rotating torque N·m or less	0.25	0.45	0.64		0.79	0.93

Note) Kinetic energy absorbable by the cushion mechanism is identical to double acting single rod.

Standard Strokes

Rod Boot Material

Symbol	Material	Max. ambient temp.
J	Nylon tarpaulin	70 °C
K	Heat resistant tarpaulin	110 °C∗

∗ Max. ambient temperature for rod boot itself.

Made to Order
(For details, refer to pages 47 to 63.)

Symbol	Specifications
-XA□	Change of rod end shape
-XC3	Special port location∗
-XC6	Made of stainless steel
-XC7	Tie-rod, cushion valve, tie-rod nut, etc. made of stainless steel
-XC8	Adjustable stroke cylinder/Adjustable extension type
-XC9	Adjustable stroke cylinder/Adjustable retraction type
-XC10	Dual stroke cylinder/Double rod type
-XC14	Change of trunnion bracket mounting position
-XC27	Double clevis and double knuckle joint pins made of stainless steel
-XC30	Rod trunnion

∗ The cover shape is the same as the current product.

For special port location (-XC3), the mounting bracket and port location can be determined using the standard product corresponding to the operating conditions. Also, this is only applicable to -XC3BB, -XC3CC and -XC3DD with trunnion bracket.

Refer to pages 38 to 45 for cylinders with auto switches.

- Auto switch proper mounting position (detection at stroke end) and its mounting height
- Minimum stroke for auto switch mounting
- Auto switch mounting brackets/Part no.
- Operating range

Mounting Brackets/Part No.

Bore size [mm]	32	40	50	63	80	100
Axial foot Note 1)	MB-L03	MB-L04	MB-L05	MB-L06	MB-L08	MB-L10

Single clevis	MB-C03	MB-C04	MB-C05	MB-C06	MB-C08	MB-C10
Double clevis	MB-D03	MB-D04	MB-D05	MB-D06	MB-D08	MB-D10

Note 1) Order two foots per cylinder.
Note 2) Accessories for each mounting bracket are as follows. Axial foot, Rod/Head flange, Single clevis/Body mounting bolt; Double clevis/Body mounting bolt, Clevis pin, Flat washers and Split pins. → Refer to page 14 for details.

Theoretical Force

OUT side is identical to double acting single rod. Refer to the table below for IN side.

Bore size [mm]	Piston area [mm^2]
32	675
40	1082
50	1651
63	2804
80	4568
100	7223

Theoretical force [N] = Pressure [MPa] x Piston area [mm^2]

Weights

[kg]

Bore size [mm]		32	40	50	63	80	100
Basic weight	Basic	0.47	0.64	1.11	1.35	2.54	3.52
	Axial foot	0.59	0.78	1.33	1.63	3.04	4.19
	Rod/Head flange	0.76	1.01	1.56	2.14	3.99	6.84
	Single clevis	0.72	0.87	1.45	1.98	3.65	6.70
	Double clevis	0.73	0.91	1.54	2.14	3.94	7.22
	Centre trunnion	0.76	1.00	1.59	2.15	4.09	7.20
Additional weight per 50 mm of stroke	All mounting brackets	0.12	0.15	0.24	0.26	0.39	0.50
Accessories	Single knuckle joint	0.15	0.23	0.26	0.26	0.60	0.83
	Double knuckle joint (with pin)	0.22	0.37	0.43	0.43	0.87	1.27

Calculation
Example) **MBKB32-100Z** (Basic, Ø 32, 100 stroke)
- Basic weight····· 0.47 (Basic, Ø 32)
- Additional weight····· 0.12/50 stroke
- Cylinder stroke····· 100 stroke

0.47 + 0.12 x 100/50 = **0.71 kg**

Replacement Parts/Seal Kit

Bore size [mm]	Kit no.	Contents
32	MBK32Z–PS	Set of the nos. ⑭, ⑮, ⑯, ⑱
40	MBK40Z–PS	
50	MBK50Z–PS	
63	MBK63Z–PS	
80	MBK80Z–PS	
100	MBK100Z–PS	

* Seal kits consist of items ⑭, ⑮, ⑯, ⑱, and can be ordered by using the seal kit number corresponding to each bore size.
* Seal kit includes a grease pack (Ø 32 to 50: 10 g, Ø 63, 80: 20 g, Ø 100: 30 g).
  Order with the following part number when only the grease pack is needed.
  Grease pack part number: GR-S-010 (10 g), **GR-S-020** (20 g)

* Model without air cushion is designed to include rubber bumpers. The overall length is longer than the cylinder with air cushion as follows because the bumpers are attached to the both sides of the piston;
  Ø 32, Ø 40: +6 mm, Ø 50, Ø 63: +8 mm, Ø 80, Ø 100: +10 mm

Without Mounting Bracket

∗1 Water resistant type auto switches can be mounted on the above models, but in such case SMC cannot guarantee water resistance. Please contact SMC regarding water resistant types with the above model numbers.

∗ Lead wire length symbols: 0.5 m ····· — (Example) M9NW
1 m ····· M (Example) M9NWM
3 m ····· L (Example) M9NWL
5 m ····· Z (Example) M9NWZ

∗ Solid state auto switches marked with "○" are produced upon receipt of order.
∗ Since there are other applicable auto switches than listed above, refer to page 45 for details.
∗ For details about auto switches with pre-wired connector, refer to the auto switch guide.
For the D-P3DWA□, refer to the auto switch guide.
∗ The D-A9□/M9□□□/P3DWA□A auto switches are shipped together, (but not assembled). (However, auto switch mounting brackets are assembled for the D-A9□/M9□□□ before shipment.)
∗∗∗ The D-P3DWA cannot be mounted on Ø 32. Use the D-P3DW.

Specifications

Bore size [mm]	32	40	50	63	80	100
Action	Double acting, Single rod					
Fluid	Air					
Proof pressure	1.5 MPa					
Max. operating pressure	1.0 MPa					
Min. operating pressure	0.15 MPa*					
Ambient and fluid temperature	Without auto switch: -10 to 70 °C With auto switch: -10 to 60 °C (No freezing)					
Lubrication	Non-lube					
Operating piston speed	50 to 1000 mm/s					
Allowable stroke tolerance	Up to 250: $^{+1.0}_{0}$, 251 to 1000: $^{+1.4}_{0}$, 1001 to 1500: $^{+1.8}_{0}$					
Cushion	Air cushion					
Port size (Rc, NPT, G)	1/8	1/4		3/8		1/2
Mounting	Basic, Axial foot, Rod flange, Head flange, Single clevis, Double clevis, Centre trunnion					

∗ 0.05 MPa except locking parts

Locking Specifications

Locking position	Head end, Rod end, Both ends					
Holding force (Max.) N	**Ø 32**	**Ø 40**	**Ø 50**	**Ø 63**	**Ø 80**	**Ø 100**
	550	860	1340	2140	3450	5390
Back lash	1.5 mm or less					
Manual release	Non-locking type, Locking type					

Standard Strokes

[mm]

Bore size	Standard stroke
32	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500
40	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500
50	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600
63	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600
80	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800
100	25, 50, 75, 100, 125, 150, 175, 200, 250, 300, 350, 400, 450, 500, 600, 700, 800

Intermediate strokes are available. (No spacer is used.)

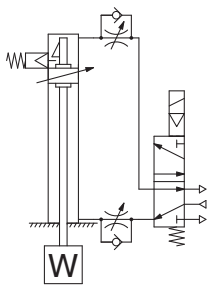
Cautions for Using

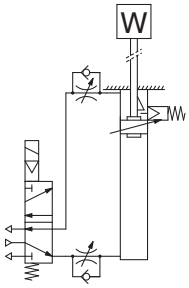
1. Use recommended pneumatic circuit.

⚠Caution

For correct operation of locking or releasing mechanism, use the following pneumatic circuit.



With locking at head end



With locking at rod end

① Do not use a 3-position solenoid valve.

Avoid using circuit with 3-position solenoid valve (especially closed centre, metal seal type).
When pressure is trapped in the port with locking mechanism, end lock is free.
When utilizing a 3-position closed centre valve, even if the lock is engaged, it may become unlocked due to pressure leakage either across the piston or the valve spool.

② Back pressure is required to release lock.

Before starting operation, supply air to side without locking mechanism as figure above, (or side without locking the piston rod for models with locking at both ends.) Otherwise, lock may not be released. (Refer to "Release of lock".)

③ Release lock when mounting or adjusting the cylinder.

If mounting is done with lock engaged, lock may be damaged.

④ Use with load 50 % or less of rated capacity.

If cylinder is used over 50 % load capacity, lock may be damaged.

⑤ Do not use multiple cylinders synchronously.

Avoid using 2 or more end lock cylinders synchronously to perform a single task because one of the cylinders may not allow lock to release.

⑥ Use a speed controller as meter-out.

Meter-in control may not allow lock to release.

⑦ Use complete stroke or cylinder at side with lock.

If cylinder piston does not reach end of stroke, lock may not be engaged or released.

2. Operating pressure

⚠Caution

Use pressures 0.15 MPa or more at port with locking mechanism. Otherwise, lock will not be released.

3. Exhaust speed

⚠Caution

When pressures at port with locking mechanism is decreased to 0.05 MPa or less, it is automatically locked. When exhaust pipe at port with locking mechanism is thin and long or speed controller is distanced from cylinder port, exhaust speed is slow and will require additional time for lock engagement. Clogging the silencer mounted on exhaust port of solenoid valve leads to the same result.

4. Relationship with cushion

⚠Caution

When cushion valve at side with locking mechanism is fully closed or nearly fully closed, piston rod may not reach the stroke end. Thus lock is not established. And when locking is done with the cushion valve nearly fully closed, adjust the cushion valve since lock may not be released.

5. Release of lock

⚠Warning

When lock is to be released, supply air pressure to the port without the locking mechanism, this relieves the load from the lock mechanism.
(Refer to recommended pneumatic circuit.) When port without lock mechanism is exhausted and locking mechanism is loaded, the lock may be damaged due to excessive force on lock during release. Also, piston rod will operate immediately.

6. Manual release

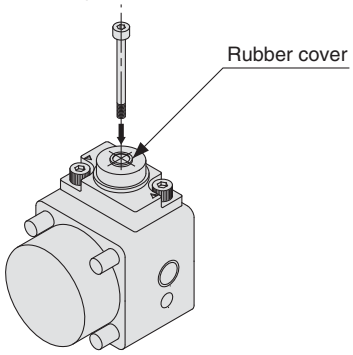
⚠Caution

Non-locking type

Insert attached bolt from upper side of rubber cover (no need to remove rubber cover), tighten locking piston and pull bolt, lock will be released. When bolt is released, locking begins to take place. Thread size, required pulling force and stroke are listed below.

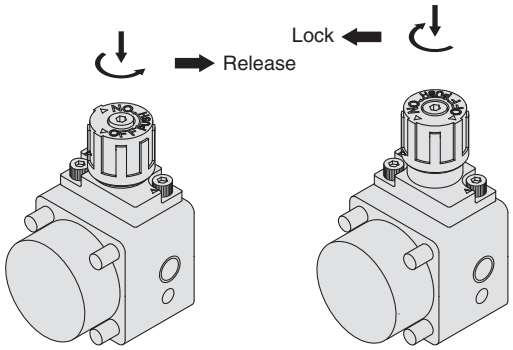
Bore size [mm]	Thread size	Pulling force	Stroke [mm]
32	≥ M2.5 x 0.45 x 25 L	4.9 N	2
40, 50, 63	≥ M3 x 0.5 x 30 L	10 N	3
80, 100	≥ M5 x 0.8 x 40 L	24.5 N	3

∗ Remove bolt under normal operations.
It may cause malfunction of locking and release.



Locking type

Turn 90° counterclockwise while pushing the M/O knob. Lock is released when ▲ on the cap and ▼ OFF mark on the M/O knob correspond. (Lock remains released.)
When locking is desired, turn 90° clockwise while fully pushing the M/O knob and correspond ▲ on the cap and ▼ ON mark on the M/O knob. Confirm the correct position by click sound "click". Otherwise, lock may not be engaged.



Locked **Released**

∗ Models with rubber bumper have different dimensions for auto switch proper mounting positions (A and B). Add the following values to both A and B: 3 mm (Ø 32 and 40), 4 mm (Ø 50 and 63), 5 mm (Ø 80 and 100), 6 mm (Ø 125).
Note) Adjust the auto switch after confirming the operating conditions in the actual setting.
Note 1) For Ø 32, the values are for the D-P3DW.

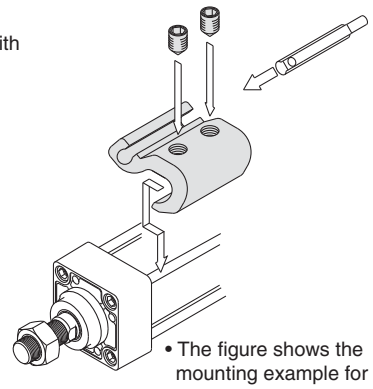
[Stainless Steel Mounting Screw]

The following stainless steel mounting screw kit (including set screws) is available. Use it in accordance with the operating environment. (Since the auto switch mounting bracket is not included, order it separately.)

BBA1: For D-A5/A6/F5/J5 types

Note 1) Refer to the auto switch guide for details on the BBA1.
The above stainless steel screws are used when a cylinder is shipped with the D-F5BA auto switch. When only one auto switch is shipped independently, the BBA1 is attached.

Note 2) When using the D-M9□A(V) or Y7BA, do not use the steel set screws which are included with the auto switch mounting brackets above (BMB5-032, BA7-□□□, BMB4-□□□, BA4-□□□). Order a stainless steel screw kit (BBA1) separately, and use the M4 x 6 L stainless steel set screws included in the BBA1.



• The figure shows the mounting example for the D-M9□(V)/M9□W(V)/ M9□A(V)/A9□(V).

∗ Values which include hysteresis are for guideline purposes only, they are not a guarantee (assuming approximately ±30 % dispersion) and may change substantially depending on the ambient environment.

Other than the applicable auto switches listed in "How to Order", the following auto switches are mountable.
Refer to the auto switch guide for the detailed specifications.

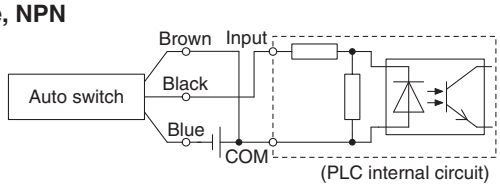
Type	Model	Electrical entry	Features
Solid state	D-M9NV/M9PV/M9BV	Grommet (Perpendicular)	—
	D-Y69A/Y69B/Y7PV		
	D-M9NWV/M9PWV/M9BWV		Diagnostic indication (2-colour indication)
	D-Y7NWV/Y7PWV/Y7BWV		
	D-M9NAV/M9PAV/M9BAV		Water resistant (2-colour indication)
	D-P4DW		Magnetic field resistant (2-colour indication)
	D-F59/F5P/J59	Grommet (In-line)	—
	D-Y59A/Y59B/Y7P		
	D-Y7H		
	D-F59W/F5PW/J59W		Diagnostic indication (2-colour indication)
	D-Y7NW/Y7PW/Y7BW		
	D-F5BA/Y7BA		Water resistant (2-colour indication)
	D-F5NT		With timer
	D-P5DW		Magnetic field resistant (2-colour indication)
Reed	D-A93V/A96V	Grommet (Perpendicular)	—
	D-A90V		Without indicator light
	D-A53/A56/Z73/Z76	Grommet (In-line)	—
	D-A67/Z80		Without indicator light

* With pre-wired connector is also available for solid state switches. For details, refer to the auto switch guide.
* Normally closed (NC = b contact) solid state auto switches (D-F9G/F9H/Y7G/Y7H) are also available. For details, refer to the auto switch guide.

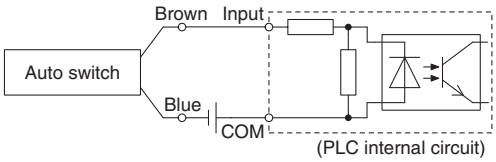
Prior to Use
Auto Switch Connection and Example

Sink Input Specifications

3-wire, NPN

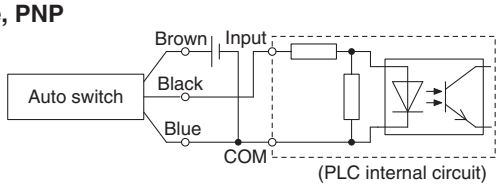


2-wire

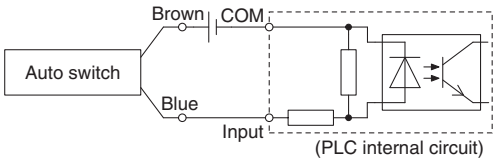


Source Input Specifications

3-wire, PNP



2-wire



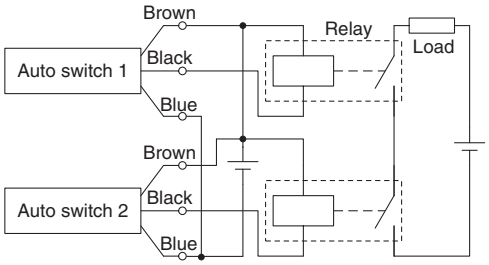
Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

Example of AND (Series) and OR (Parallel) Connection

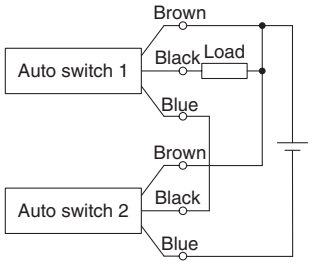
∗ When using solid state auto switches, ensure the application is set up so the signals for the first 50 ms are invalid.

3-wire AND connection for NPN output

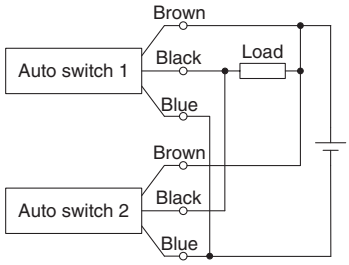
(Using relays)



(Performed with auto switches only)

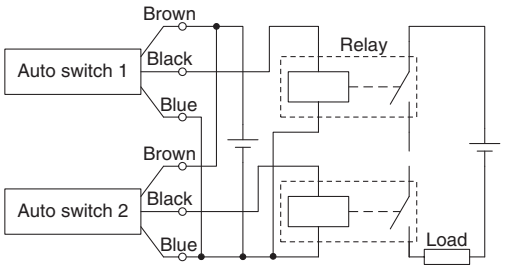


3-wire OR connection for NPN output

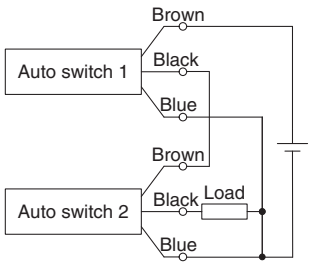


3-wire AND connection for PNP output

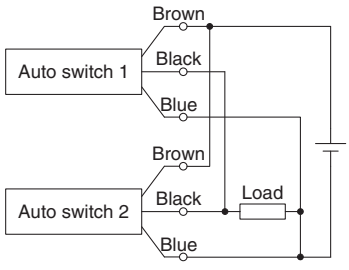
(Using relays)



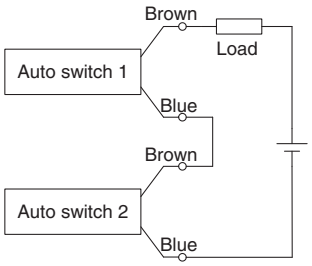
(Performed with auto switches only)



3-wire OR connection for PNP output



2-wire AND connection

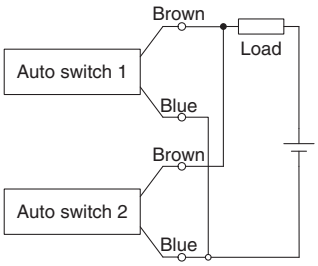


When two auto switches are connected in series, a load may malfunction because the load voltage will decline when in the ON state.
The indicator lights will light up when both of the auto switches are in the ON state.
Auto switches with load voltage less than 20 V cannot be used.

Load voltage at ON = Power supply voltage – Residual voltage x 2 pcs.
= 24 V – 4 V x 2 pcs.
= 16 V

Example: Power supply is 24 V DC
Internal voltage drop in auto switch is 4 V.

2-wire OR connection



(Solid state)
When two auto switches are connected in parallel, malfunction may occur because the load voltage will increase when in the OFF state.

(Reed)
Because there is no current leakage, the load voltage will not increase when turned OFF. However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

Load voltage at OFF = Leakage current x 2 pcs. x Load impedance
= 1 mA x 2 pcs. x 3 kΩ
= 6 V

Example: Load impedance is 3 kΩ.
Leakage current from auto switch is 1 mA.

Simple Specials/Made to Order

Please contact SMC for detailed specifications, delivery and prices.

■Simple Specials

The following special specifications can be ordered as a simplified Made-to-Order.
There is a specification sheet available on paper and CD-ROM. Please contact your SMC sales representatives if necessary.

Series MB
Simple Specials

These changes are dealt with Simple Specials System.

1 Change of Rod End Shape

Symbol
-XA0 to XA30

Series		Action	Symbol for change of rod end shape	Note
Standard type	MB	Double acting, Single rod	XA0 to 30	Except pivot bracket and rod end bracket
	MBW	Double acting, Double rod	XA0 to 30	Except pivot bracket and rod end bracket
Non-rotating rod type	MBK	Double acting, Single rod	XA0, 1, 6, 10, 11, 13, 14, 17, 19, 21	
With end lock	MBB	Double acting, Single rod	XA0 to 30	

Precautions

1. SMC will make appropriate arrangements if no dimension, tolerance, or finish instructions are given in the diagram.
2. Standard dimensions marked with "*" will be as follows to the rod diameter (D). Enter any special dimension you desire.
   D ≤ 6 → D – 1 mm 6 < D ≤ 25 → D – 2 mm D > 25 → D – 4 mm
3. In the case of double rod type and single acting retraction type, enter the dimensions when the rod is retracted.

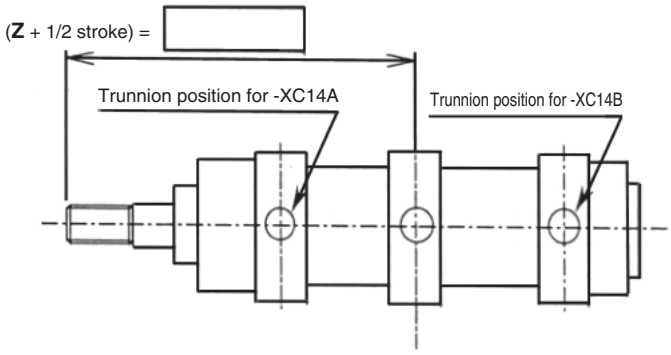
2 Change of Trunnion Bracket Mounting Position

Symbol
-XC14

The position for mounting the trunnion pivot bracket on the cylinder can be moved from the standard mounting position to any desired position.

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	
	MBW	Double acting, Double rod	
Non-rotating rod type	MBK	Double acting, Single rod	
With end lock	MBB	Double acting, Single rod	



Precautions

1. Specify "Z + 1/2 stroke" in the case the trunnion bracket position is not -XC14A, B or trunnion is not a centre trunnion.
2. SMC will make appropriate arrangements if no dimension, tolerance, or finish instructions are given in the diagram.
3. The possible range of trunnion bracket mounting position is indicated in the table below.
4. Some trunnion mounting positions do not allow auto switch mounting. Please consult with SMC for more information.

[mm]

Symbol / Bore size	**Z** + 1/2 stroke

Symbol
2 Heat Resistant Cylinder (–10 to 150 °C) -XB6

Air cylinder which changed the seal material and grease, so that it could be used even at higher temperature up to 150 from –10 °C.

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	Except with rubber bumper and with auto switch
	MBW	Double acting, Double rod	Except with rubber bumper and with auto switch

Note 1) Operate without lubrication from a pneumatic system lubricator.
Note 2) Please contact SMC for details on the maintenance intervals for this cylinder, which differ from those of the standard cylinder.
Note 3) In principle, it is impossible to make built-in magnet type and the one with auto switch. But, as for the one with auto switch, and the heat resistant cylinder with heat resistant auto switch, please contact SMC.
Note 4) Piston speed is ranged from 50 to 500 mm/s.

How to Order

[Standard model no.] – **XB6**

Heat resistant cylinder

Specifications

Ambient temperature range	–10 °C to 150 °C
Seal material	Fluororubber
Grease	Heat resistant grease
Specifications other than above and external dimensions	Same as standard type

⚠ Warning

Precautions

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

Symbol
3 Low Speed Cylinder (5 to 50 mm/s) -XB13

Even if driving at lower speeds 5 to 50 mm/s, there would be no stick-slip phenomenon and it can run smoothly.

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	Except Ø 125

Note) The cover shape is the same as the current product.

How to Order

Standard model no. – **XB13**

Low speed cylinder

Specifications

Piston speed	5 to 50 mm/s
Dimensions	Same as standard type
Specifications other than above	Same as standard type

Note 1) Operate without lubrication from a pneumatic system lubricator.
Note 2) For the speed adjustment, use speed controllers for controlling at lower speeds. (Series AS-FM/AS-M)

⚠Warning
Precautions

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

Symbol
4 Special Port Location -XC3

Compared with the standard type, a cylinder which changes the connection port location of rod/head cover and the location of cushion valve.

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	
	MBW	Double acting, Double rod	
Non-rotating rod type	MBK	Double acting, Single rod	
	MBKW	Double acting, Double rod	

Note) The cover shape is the same as the current product.

How to Order

MB

MBK
MBKW

Mounting style | **Bore size** – **Stroke** | **Suffix** – **XC3** | **A** | **C**

Special port location

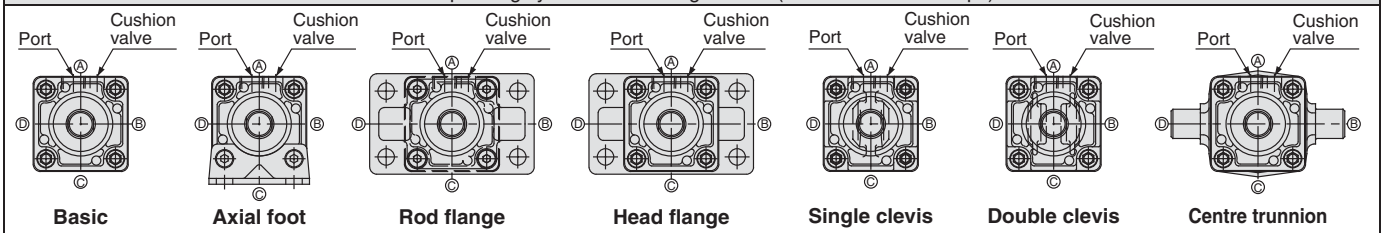
Cushion valve location seen from the rod side
Rod port location seen from the rod side

∗ For port location, refer to the following diagrams and show the symbols of A, B, C and D.

Specifications: Same as standard type

Relationship between Port Location and Cushion Valve Location

Corresponding symbol of mounting bracket (Positional relationships)



Basic **Axial foot** **Rod flange** **Head flange** **Single clevis** **Double clevis** **Centre trunnion**

1. Symbol of position for port and cushion valve has to be looked from the rod side, as figures above. (In the case of standard cylinders, port must be positioned in the upper side.) Define the upper side to be A, and then B, C, and D in a clockwise order.
2. Model of combination between port and cushion valve is applicable only when the position of a port and a cushion valve on the rod cover and the head cover will be changed to the same position against the support bracket, as a rule.
3. XC3AA is not available in terms of the position between port and cushion valve, since it is available in the standard products.

Symbol

5 With Heavy Duty Scraper -XC4

It is suitable for using cylinders under the environment, where there are much dusts in a surrounding area by using a heavy duty scraper on the wiper ring, or using cylinders under earth and sand exposed to the die-casted equipment, construction machinery, or industrial vehicles.

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	Except Ø 125
	MBW	Double acting, Double rod	Except Ø 125

How to Order

Standard model no. – XC4

With heavy duty scraper

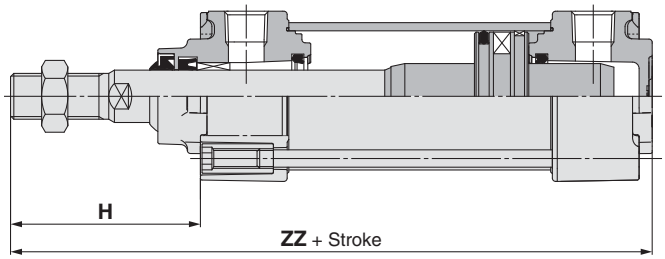
Specifications: Same as standard type

⚠Caution

Do not replace heavy duty scrapers.

- Since heavy duty scrapers are press-fit, do not replace the cover only, but rather the entire rod cover assembly.

Construction (Dimensions are the same as standard.)



[mm]

Bore size	H	ZZ
32	47	135
40	58	146
50	67	165
63	67	165

100	81	199

Symbol

6 Heat Resistant Cylinder (-10 to 110 °C) -XC5

Cylinder which changed the seal material for heat resistance (up to 110 °C) in order to use under the severe ambient temperature condition which exceeds the standard specifications of -10 to 70 °C.

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	Except with rubber bumper and with auto switch
	MBW	Double acting, Double rod	Except Ø 125, with rubber bumper and with auto switch

How to Order

Standard model no. – XC5

Heat resistant cylinder

Specifications

Ambient temperature range	-10 °C to 110 °C
Seal material	Fluororubber
With auto switch	Unavailable Note 2)
Specifications other than above and external dimensions	Same as standard type

Note 1) Please contact SMC for details on the maintenance intervals for this cylinder, which differ from those of the standard cylinder.
Note 2) Manufacturing built-in magnet type and the one with auto switch is impossible.
Note 3) Rod boot material is heat resistant tarpaulin.

Symbol

7 Made of Stainless Steel -XC6

Suitable for the cases it is likely to generate rust by being immersed in the water and corrosion.

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	Ø 125 only
	MBW	Double acting, Double rod	Ø 125 only
Non-rotating rod type	MBK	Double acting, Single rod	
	MBKW	Double acting, Double rod	

How to Order

Standard model no. – XC6

Made of stainless steel

Specifications

Parts changed to stainless steel	Piston rod, Rod end nut
Max. manufacturable stroke [mm]	Double acting, Single rod: 1500 Double acting single rod with rod boot: 1000
Specifications other than above and external dimensions	Same as standard type

Symbol
8 Tie-rod, Cushion Valve, Tie-rod Nut, etc. Made of Stainless Steel -XC7

When using in locations where the rust generation or corrosion likelihood exists, the standard parts material have been partly changed to the stainless steel.

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	Except Ø 125
	MBW	Double acting, Double rod	Except Ø 125
Non-rotating rod type	MBK	Double acting, Single rod	
	MBKW	Double acting, Double rod	

Specifications

Component parts changed to stainless steel	Tie-rod, Tie-rod nut, Bracket mounting bolt, Cushion valve, Lock nut
Specifications other than above	Same as standard type
Dimensions	Same as standard type

How to Order

Standard model no. – **XC7**

Tie-rod, cushion valve, tie-rod nut, etc. made of stainless steel

Symbol
9 Adjustable Stroke Cylinder/Adjustable Extension Type -XC8

It adjusts the extending stroke by the stroke adjustable mechanism equipped in the head side. (After the stroke is adjusted, with cushion on both sides is altered to single-sided, with cushion.)

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	Except Ø 125, head flange and clevis types
Non-rotating rod type	MBK	Double acting, Single rod	Except Ø 125, head flange and clevis types

Specifications

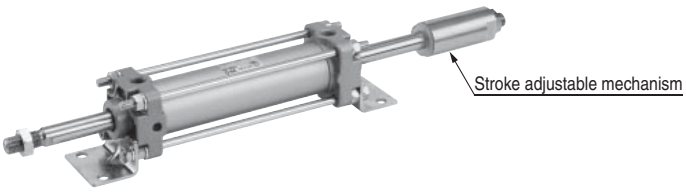
Stroke adjustment symbol	A	B
Stroke adjustment range [mm]	0 to 25	0 to 50
Specifications other than above	Same as standard type	

How to Order

MB
MBK | Mounting style | Bore size | – | Stroke | Suffix | Stroke adjustment symbol | Z – | Pivot bracket | Rod end bracket | – XC8

∗ Except head flange and clevis types

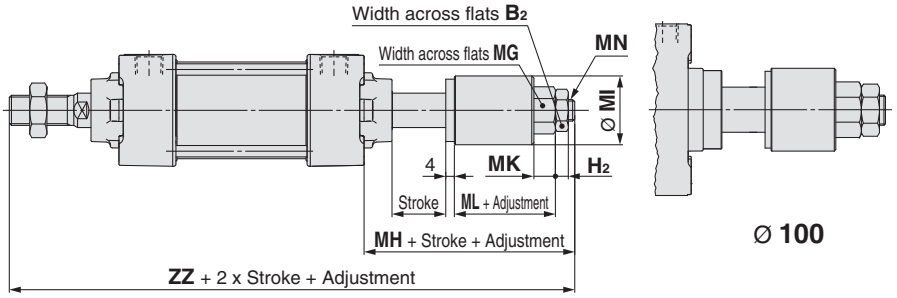
Adjustable stroke cylinder/Adjustable extension type



⚠Warning
Precautions

1. When the cylinder is operating, if something gets caught between the stopper bracket for adjusting the stroke and the cylinder body, it could cause bodily injury or damage the peripheral equipment. Therefore, take preventive measures as necessary, such as installing a protective cover.
2. To adjust the stroke, make sure to secure the wrench flats of the stopper bracket by a wrench, etc. before loosening the lock nut. If the lock nut is loosened without securing the stopper bracket, be aware that the area that joins the load to the piston rod or the area in which the piston rod is joined with the load side and the stopper bracket side could loosen first. It may cause an accident or malfunction.

Dimensions (Dimensions other than below are the same as standard type.)



[mm]

Stroke adjustment range [mm]	0 to 25	0 to 50
Specifications other than above	Same as standard type	

How to Order

MB
MBK [Mounting style] [Bore size] – [Stroke] [Suffix] [Stroke adjustment symbol] **Z** – [Pivot bracket] [Rod end bracket] – **XC9**

∗ Except head flange and clevis types

Adjustable stroke cylinder/Adjustable retraction type

(After the stroke is adjusted, with cushion on both sides is altered to single-sided, with cushion.)

⚠Caution

Precautions

1. When air is supplied to the cylinder, if the stroke adjustment bolt is loosened in excess of the allowable stroke adjustment amount, be aware that the stroke adjustment bolt could fly out or air could be discharged, which could injure personnel or damage the peripheral equipment.
2. Adjust the stroke when the cylinder is not pressurised.
   If it is adjusted in the pressurised state, the seal of the adjustment section could become deformed, leading to air leakage.

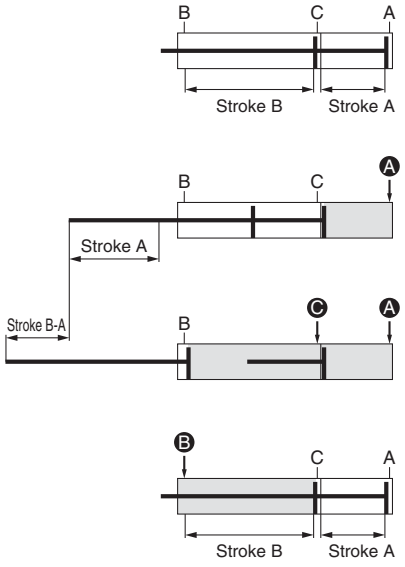
100	52	90	14.6	243	319

Functional description of dual stroke cylinder



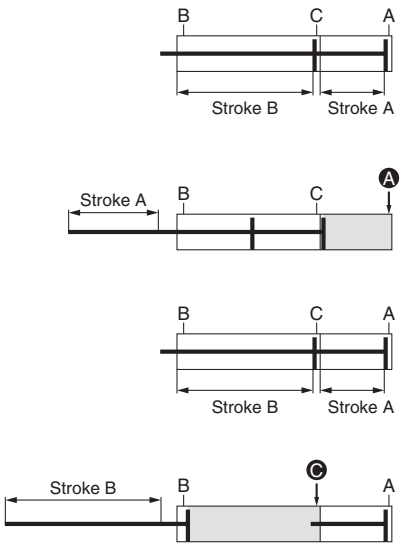
1) Initial state
(0 stroke position)

2) 1st stage
(Stroke A operation)
When the air pressure is supplied from the A port, the rod operates the stroke A.

3) 2nd stage
(Stroke B-A operation)
Following the 1st stage, when the air pressure is supplied from the C port, the rod operates the stroke B-A.

4) Cylinder retraction
When the air pressure is supplied from the B port, the rod retracts completely.

Stroke A or Stroke B operation can be made individually.



Stroke A operation

1) Initial state
(0 stroke position)

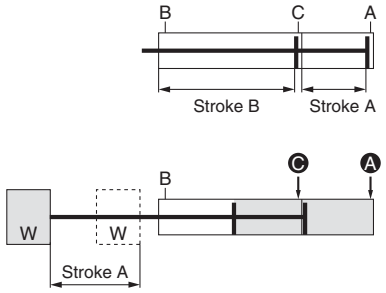
2) Operation
When the air pressure is supplied from the A port, the rod operates the stroke A.

Stroke B operation

1) Initial state
(0 stroke position)

2) Operation
When the air pressure is supplied from the C port, the rod operates the stroke B.

Double output is possible.



1) Initial state
(0 stroke position)

2) Double output
When the air pressure is supplied to the A and C ports at the same time, the double output can be obtained in the stroke A range.

⚠Caution

Precautions

1. Do not supply air until the cylinder is fixed with the attached bolt.
2. If air is supplied without securing the cylinder, the cylinder could lurch, posing the risk of bodily injury or damage to the peripheral equipment.

Symbol
13 Tandem Cylinder -XC12

This is a cylinder produced with two air cylinders in line allowing double the output force.

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	Except Ø 125

How to Order

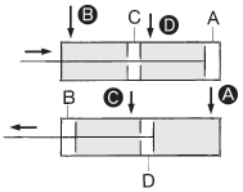
Standard model no. – **XC12**

Tandem cylinder

Specifications

Max. manufacturable stroke [mm]	500
Specifications other than above	Same as standard type

Function



When air pressure is supplied to ports ❶ and ❹, the output force is doubled in the retract stroke.

When air pressure is supplied to ports ❷ and ❸, the output force is doubled in the out stroke.

Symbol

24 Spatter Resistant Coil Scraper, Grease for Welding (Piston rod: S45C) -XC91

With coil scraper and grease for welding

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	Except Ø 125

Specifications

Piston rod	S45C (With hard chrome plated)
Scraper	With coil scraper
Grease	Grease for welding
Other specifications	Same as standard type

How to Order

Standard model no. – **XC91**

Spatter resistant coil scraper, Grease for welding (Piston rod: S45C)

Dimensions (Dimensions other than below are the same as standard type.)

Bore size	H	ZZ
32	47	135
40	58	146
50	67	165
63	67	165
80	81	199
100	81	199

25 Cylinder with Heat Resistant Reed Auto Switch (-10 to 120 °C)

Symbol **-X1184**

Applicable Series

Description	Model	Action	Note
Standard type	MB	Double acting, Single rod	

How to Order

MDB [Standard model no.] **Z –** [Pivot bracket] [Rod end bracket] **–** [Heat resistant reed auto switch] [ ] **– X1184**

Switch model

Symbol	Description
—	Without switch
B30	D-B30
B30J	D-B30J
B31	D-B31
B31J	D-B31J
B35	D-B35
B35J	D-B35J

Number of switches

Symbol	Description
S	1 pc.
—	2 pcs.
n	n pcs.

Cylinder with heat resistant reed auto switch

∗ Refer to the auto switch guide for details about the D-B3 auto switch and the Specific Product Precautions.

Specifications

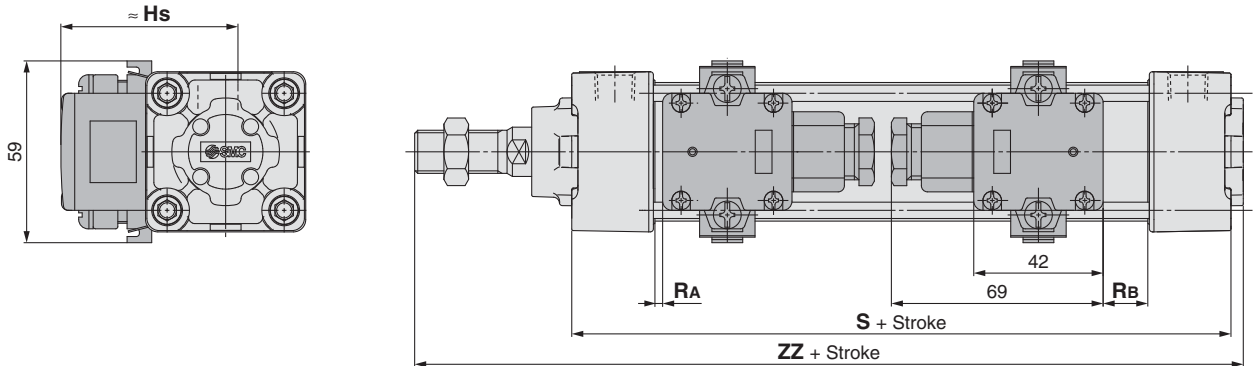
Ambient temperature range	-10 °C to 120 °C
Bore size	40, 50, 63, 80, 100
Seal material	Fluororubber
Grease	Heat resistant grease

⚠ Warning

Precautions

Be aware that smoking cigarettes etc. after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

Dimensions (Dimensions other than below are the same as standard type.)



[mm]

Bore size	S	ZZ	Hs	RA	RB	Minimum mounting stroke		Auto switch mounting bracket part number
						Other than centre trunnion	Centre trunnion

Specific Product Precautions

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For Actuator and Auto Switch Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on the SMC website, http://www.smc.eu

Adjustment

⚠Warning

1. Do not open the cushion valve beyond the stopper.

Crimping (Ø 32) or a retaining ring (Ø 40 to Ø 100) is provided to prevent the accidental removal of the cushion valve. Do not open the valve beyond the mechanism. If air is supplied, the cushion valve may shoot out from the cover.

Bore size [mm]	Cushion valve width across flats [mm]	Hexagon wrench
32, 40	2.5	JIS 4648 Hexagonal wrench key 2.5
50, 63	3	JIS 4648 Hexagonal wrench key 3
80, 100, 125	4	JIS 4648 Hexagonal wrench key 4

2. Use the air cushion at the end of cylinder stroke.

Select the cylinder with bumper if the cushion valve is to be fully opened. Otherwise, tie-rods or piston assembly may be damaged.

3. When replacing mounting brackets, use a hexagon wrench.

Bore size [mm]		Bolt	Width across flats [mm]	Tightening torque [N·m]
32, 40		MB-32-48-C1247	4	5.1
50, 63		MB-50-48-C1249	5	11
80, 100	Foot	MB-80-48AC1251	6	25
	Others	MB-80-48BC1251		
125	Foot	CE00008	8	30.1
	Others	CE00032		

4. When replacing mounting brackets, tie-rod nuts on the cylinder body become loosened.

After retightening the tie-rod nuts with the proper tightening torque (Refer to Adjustment 3.), mount a mounting bracket.

5. Do not disassemble the trunnion type cylinder because the mounting precision is required.

It is difficult to align the axial centre of the trunnion with the axial centre of the cylinder. Thus, if this type of cylinder is disassembled and reassembled, the required dimensional accuracy cannot be attained, which may lead to malfunctions.

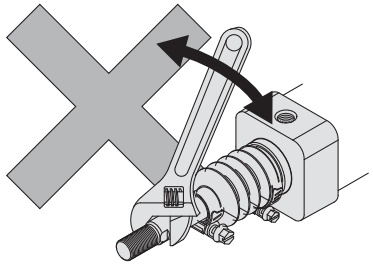
With Rod Boot

Handling

⚠Caution

1. Do not turn the piston rod with the rod boot kept locked.

When turning the piston rod, loosen the band once and do not twist the rod boot.



2. Set the breathing hole in the rod boot downward or in the direction that prevents entry of dust or water content.

⚠ Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of **"Caution," "Warning"** or **"Danger."** They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

⚠ Caution: **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

⚠ Warning: **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Danger : **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

*1) ISO 4414: Pneumatic fluid power – General rules relating to systems.
ISO 4413: Hydraulic fluid power – General rules relating to systems.
IEC 60204-1: Safety of machinery – Electrical equipment of machines.
(Part 1: General requirements)
ISO 10218-1: Manipulating industrial robots - Safety.
etc.

⚠ Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.
Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.
The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.
1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.
1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue.
3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

⚠ Caution

1. The product is provided for use in manufacturing industries.
The product herein described is basically provided for peaceful use in manufacturing industries.
If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.
If anything is unclear, contact your nearest sales branch.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".
Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, wichever is first.*2)
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.

*2) **Vacuum pads are excluded from this 1 year warranty.**
A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.
Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

⚠ Caution

SMC products are not intended for use as instruments for legal metrology.
Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

⚠ Safety Instructions Be sure to read "Handling Precautions for SMC Products" (M-E03-3) before using.
