

# Vacuum pad

New

RoHS

Flat Type with Ribs	Bellows Type	Ø 20, Ø 25, Ø 32, Ø 40, Ø 50
2.5-Stage Bellows Type		Ø 32, Ø 40, Ø 50

Suitable for the adsorption transfer of corrugated cardboard, etc., requiring abrasion resistance

**Material: FS61 (Fluoro-based rubber) improves abrasion resistance**

\* More than 4 times the abrasion resistance of SMC's urethane vacuum pads

**Reduced suction of foreign matter, such as paper particles, due to mesh filter** p. 1

Can be replaced without tools

**2.5-stage bellows type** p. 1

Optional inner ring and retainer

**Application** For the transfer of corrugated cardboard

**ZP3C** □ Series

**SMC**

CAT.EUS100-177A-UK

## Reduced suction of foreign matter due to mesh filter

- Reduced suction of foreign matter into the vacuum pump and ejector
- The pad and mesh filter can be replaced without tools.

## The separation and disposal of the metal and rubber parts is possible.

## Compatible with 2 types of mounting tools

- Mounting with a hexagon wrench
- Mounting with a standard wrench

## 2.5-Stage Bellows Type

### The large stroke is suitable for workpieces with:

- Differences in height
- Steps
- Inclined surfaces
- Soft workpieces requiring cushioning

### Adapts to changes in shape after adsorption

It is effective when adsorbing the corrugated cardboard that has low rigidity and experiences deformation.

## 2.5-Stage Bellows Type

### Optional inner ring

Adding the optional inner rings improves the removal force and adsorption performance on uneven surfaces.

\* For size Ø 50  
When adsorbing on a dry, flat, and smooth plane surface at -60 kPa of vacuum pressure

### With retainer

#### Direct installation without tools

#### Multiple mounting examples

### Reduced height: space saving and reduces deflection of the workpiece during transfer.

#### Direct mounting with a retainer

#### Thread mounting

### Improved cycle time

Reduced settling time during acceleration/deceleration

## Variations

### Flat Type with Ribs, Bellows Type

Mounting	Type	Vacuum inlet direction	Connection			Vacuum inlet	
			Type	Pad diameter		Pad diameter	
				Ø 20, Ø 25, Ø 32	Ø 40, Ø 50	Ø 20, Ø 25, Ø 32	Ø 40, Ø 50
<b>With adapter</b> 	Thread mounting	Vertical	Male thread	M8 x 1	M10 x 1	Use the connection thread.	
				G1/8	G1/4		
			Female thread	G1/8	G1/4		
<b>With buffer</b> 	Plate mounting	Vertical	Male thread	M14 x 1	M18 x 1.5	Rc1/8	
		Lateral				M5 x 0.8

\* Use the connection thread for the vacuum inlet.

## Specifications

### Material Specifications

Material	FS61 (Fluoro-based rubber)
Colour of rubber	Green
Rubber hardness (Shore A: $\pm 5^\circ$ )	65
Operating temperature range*1	0 °C to 200 °C
Ambient temperature	0 °C to 150 °C

\*1 Surface temperature of the workpiece to be adsorbed

### Pad Specifications

Form	Pad diameter	Effective adsorption area [cm <sup>2</sup> ]	Adsorption force*1 [N]	Removal force*2 [N]	Internal capacity [cm <sup>3</sup> ]
Flat type with ribs	Ø 20	1.7	10.0	18.3	1.0
	Ø 25	2.0	11.8	25	1.3
	Ø 32	2.3	13.9	34.6	1.7
	Ø 40	6.1	36.7	58.2	4.3
	Ø 50	7.1	42.4	79.4	6.9
Bellows type	Ø 20	2.3	13.7	17	3.1
	Ø 25	2.8	16.6	25.9	5.4
	Ø 32	3.0	17.9	30.4	8.0
	Ø 40	4.7	27.9	47	17.7
	Ø 50	6.5	39.3	69.6	26.8

\*1 The adsorption force is a theoretical value calculated by: effective adsorption area x vacuum pressure (-60 [kPa]).

\*2 The removal force is a measured value when adsorbing on a dry, flat, and smooth surface at -60 kPa of vacuum pressure.

### Adapter Specifications

Connection	Male thread		Female thread	
Pad diameter	Ø 20 to Ø 32	Ø 40, Ø 50	Ø 20 to Ø 32	Ø 40, Ø 50
Connection thread	M8 x 1 G1/8	M10 x 1 G1/4	G1/8	G1/4
Vacuum inlet	Use the connection thread.

20	●	—
30	●	●
50	—	●

#### 7 Mesh filter

—	Without mesh filter
MF	With mesh filter

\* For the type with a retainer, the filter will come with the product as standard.

#### 8 Connection thread

Type	Thread	Symbol	Size	Pad diameter [mm]	
				Ø 32	Ø 40, Ø 50
Thread mounting	Male thread	A8	M8 x 1	●	—
		A10	M10 x 1	—	●
		AG01	G1/8	●	—
		AG02	G1/4	—	●
	Female thread	BG01	G1/8	●	—
		BG02	G1/4	—	●

\* Use the connection thread for the vacuum inlet.

#### 9 Inner ring

—	Without inner ring
R	With inner ring

## Specifications

### Material Specifications

Pad	Material	FS61 (Fluoro-based rubber)
	Colour of rubber	Green
	Rubber hardness (Shore A: $\pm 5^\circ$ )	65
	Operating temperature range*1	0 °C to 200 °C
	Ambient temperature	0 °C to 150 °C
Inner ring	Material	POM
	Ambient temperature	0 °C to 90 °C

\*1 Surface temperature of the workpiece to be adsorbed

### Pad Specifications

Pad diameter	Effective adsorption area [cm <sup>2</sup> ]	Adsorption force*1 [N]	Removal force*2 [N]		Internal capacity [cm <sup>3</sup> ]
			Without inner ring	With inner ring	
Ø 32	2.6	15.8	31.6	34.8	13.0
Ø 40	4.8	28.7	52.6	62.1	27.9
Ø 50	8.1	48.9	74.2	89.7	50.6

\*1 The adsorption force is a theoretical value calculated by: effective adsorption area x vacuum pressure (-60 [kPa]).

\*2 The removal force is a measured value when adsorbing on a dry, flat, and smooth surface at -60 kPa of vacuum pressure.

### Adapter Specifications

Connection	Male thread		Female thread	
Pad diameter	Ø 32	Ø 40, Ø 50	Ø 32	Ø 40, Ø 50
Connection thread	M8 x 1 G1/8	M10 x 1 G1/4	G1/8	G1/4
Vacuum inlet	Use the connection thread.			

### Buffer Specifications

Pad diameter		Ø 32			Ø 40, Ø 50		
Non-rotating specification		JB: Rotating, With bushing					
Stroke [mm]		10	20	30	10	30	50
Connection thread		M14 x 1			M18 x 1.5		
Spring reaction force [N]	At 0 stroke	3.0			5.0		
	At full stroke	4.5	5.0	5.2	6.5	8.5	10.5

### Filter Specifications

Mounting	With adapter	With retainer*1
Mesh	60	—
Opening	250 µm	Hole diameter: 200 µm

\*1 For the type with a retainer, etched filters are used.

## ZP3C □ Series

# Vacuum pad/Specific Product Precautions

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For vacuum equipment precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smc.eu>

### Design

- When handling workpieces that are permeable or prone to vacuum leakage, there will be a drop in vacuum pressure.  
Make sure to take the drop in vacuum pressure into account when selecting the appropriate products.  
Check whether the target vacuum pressure can be reached with the actual equipment before use.

### Mounting

- When mounting the product, tighten with the tightening torque shown in the table below.  
If excessive or insufficient tightening torque is applied, sealing failure or loose screws may result.  
When using a product equipped with a buffer, if the buffer is tightened to a torque beyond the appropriate tightening torque range, the buffer may malfunction.

#### With Adapter (Male thread type)

Model	Connection thread size	Proper tightening torque [N·m]
ZP3C□-T□(C/B/J2)FS-□-A8-□	M8 x 1.0	4.5 to 5.5
ZP3C□-T□(C/B/J2)FS-□-A10-□	M10 x 1.0	8 to 10
ZP3C□-T□(C/B/J2)FS-□-AG01-□	G1/8	3 to 5
ZP3C□-T□(C/B/J2)FS-□-AG02-□	G1/4	8 to 12

#### With Adapter (Female thread type)

Model	Connection thread size	Proper tightening torque [N·m]
ZP3C□-T□(C/B/J2)FS-□-BG01-□	G1/8	3 to 5
ZP3C□-T□(C/B/J2)FS-□-BG02-□	G1/4	8 to 12

#### With Buffer

Model	Connection thread size	Proper tightening torque [N·m]
ZP3C□-(T/Y)(20 to 32)(C/B/J2)FSJB□-□-□	M14 x 1	6.5 to 7.5
ZP3C□-(T/Y)(40/50)(C/B/J2)FSJB□-□-□	M18 x 1.5	28 to 32

### How to Mount/Remove the Retainer

#### 1. Mounting

After mounting the pad onto the plate, insert the retainer.

#### 2. Removing

<Tool examples>

- Relay pliers
- End nippers

### Handling

#### 1. Periodically inspect the mesh filter.

An adsorbing malfunction may be caused by the clogging of the mesh filter.

#### 2. When the vacuum pad is pressed, make sure it stays within the stroke range.

If this product is used with a stroke exceeding the maximum stroke, the pad may be broken or may reach the end of its service life earlier.

#### 3. Vacuum pads are consumable. Please replace them when cracks or deformation is confirmed during periodic maintenance.

## Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “Caution,” “Warning” or “Danger.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC) <sup>1)</sup>, and other safety regulations.

### Danger:

**Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

### Warning:

**Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

### Caution:

**Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

- 1) ISO 4414: Pneumatic fluid power – General rules and safety requirements for systems and their components.  
ISO 4413: Hydraulic fluid power – General rules and safety requirements for systems and their components.  
IEC 60204-1: Safety of machinery – Electrical equipment of machines. (Part 1: General requirements)  
ISO 10218-1: Robots and robotic devices – Safety requirements for industrial robots – Part 1: Robots.  
etc.

## Warning

### 1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

### 2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

### 3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

### 4. Our products cannot be used beyond their specifications. Our products are not developed, designed, and manufactured to be used under the following conditions or environments.

**Use under such conditions or environments is not covered.**

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, fuel equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogues and operation manuals.
3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

## Caution

**We develop, design, and manufacture our products to be used for automatic control equipment, and provide them for peaceful use in manufacturing industries.**

**Use in non-manufacturing industries is not covered.**

Products we manufacture and sell cannot be used for the purpose of transactions or certification specified in the Measurement Act.

The new Measurement Act prohibits use of any unit other than SI units in Japan.

## Limited warranty and Disclaimer/Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”. Read and accept them before using the product.

### Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first. <sup>2)</sup> Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.
- 2) Vacuum pads are excluded from this 1 year warranty.  
A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

### Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

## Safety Instructions

Be sure to read “Handling Precautions for SMC Products” (M-E03-3) before using.
