# High-Precision <br> Digital Pressure Switch 

New An M12 connector type has been added to the 20B series. p. 13-1

NeWA low pressure range type has been added to the 20A series.
Made to Order p. 6

## It is possible to change the settings

## while checking the measured value.

Sub screen
Label (Display item), Set value (Threshold value)

*1 Face seal fitting *2 Compression fitting *3 With $1 / 4$ (R, NPT, G) M5 female threaded
*4 A block parameter or data storage function is provided with the IO-Link compatible type. $* 5$ Only the $\varnothing 4 \mathrm{~mm}$ or $\varnothing 6 \mathrm{~mm}$ elbow type One-touch fitting is applicable.

## Improved Operability

## Visualization of Settings

The sub screen (label) shows the item to be set.

## Simple 3-Step Setting

When the $S$ button is pressed and the set value ( $P_{-} 1$ ) is being displayed, the set value (threshold value) can be set. When the $S$ button is pressed and the hysteresis ( $\mathrm{H} \_1$ ) is being displayed, the hysteresis value can be set.

## Easy Screen Switching

It is possible to change the settings while checking the measured value.

| Main screen <br> Measured value <br> (Current pressure value) |
| :--- |
| Sub screen/Left side |
| Label (Display item) |
| Sub screen/Right side |
| Set value <br> (Threshold value) |

__The sub screen can be switched by pressing the up/down buttons. $\qquad$

* One additional arbitrary display mode can be added via the function settings. (Refer to page 3.)
* Example for 1 output

## 3 Setting Modes Select the setting mode that best meets your needs.

## Improved Operability

## Other Sub Screen Display

The peak value or bottom value, or both values can be displayed on one screen!

* Peak and bottom values are maintained even if the power supply is cut.

Peak value/Bottom value

* A combination of the displays shown above and the set values can be displayed on the 2 sub screens.

## Delay Time 1.5 ms* or less

*1 Select from 1.5 ms or less, $20 \mathrm{~ms}, 100 \mathrm{~ms}, 500 \mathrm{~ms}, 1000 \mathrm{~ms}, 2000 \mathrm{~ms}$, or 5000 ms .

## Convenient Functions

| Functions | Copy function | Auto-shift function | Security code | Power saving mode | Resolution switch function | MPa/kPa switch function |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 20 | - | - |  |  |  |  |
| 20A | - | - |  |  |  |  |
| 20B | - | - |  |  |  |  |
| 20B-L | - | - |  |  |  |  |
| 20C | - | - |  |  |  |  |
| 20C-L | - | - |  |  |  |  |

## Copy function

The set values of the sensor can be copied.

## Auto-shift function

This measures the pressure at the time of external input and uses it as a reference to correct the on-off point of the switch.

## Security code

The key-lock function keeps unauthorized persons from tampering with the settings.

## Power saving mode

Power consumption is reduced by turning off the monitor.

| Series | Current consumption | Reduction rate*1 |
| :---: | :---: | :---: |
| $\mathbf{2 0}$ | 25 mA or less | Approx. $60 \%$ reduction |
| 20A |  | Approx. $40 \%$ <br> reduction |
| $\mathbf{2 0 B}(-L)$ | 35 mA or less |  |
| 20C(-L) |  |  |

*1 In power saving mode

Display resolution switch function
Reduces monitor flickering

(Only the displayed values are changed; the accuracy remains the same.)

## OMPa/kPa switch function

Vacuum, compound, and/or positive pressure can be displayed in MPa or kPa.

## Compact \& Lightweight

Compact: Max. 17.5 mm shorter
(When an M5 female thread is used.)

## Improved Installability

## Lightweight: Max. 21 g lighter <br> (When an M5 female thread is used.)

## Connector type

Wiring is possible after piping has been connected.

## New

M12 connector type
p. 13-1

## Mounting

Available Mounting Options

| Series | Bracket A | Bracket B | Bracket C | Panel mount |
| :---: | :---: | :---: | :---: | :---: |
| 20 | $\bullet$ | $\bullet$ | - | $\bullet$ |
| 20A | $\bullet$ | $\bullet$ | - | $\bullet$ |
| 20B(-L) | $\bullet$ | $\bullet$ | - | $\bullet$ |
| $20 \mathrm{C}(-\mathrm{L})$ | $\bullet$ | - | $\bullet$ | $\bullet$ |

Enclosure

## Connector structure

Enclosure Ratings

| Series | IP40 | IP65 |
| :---: | :---: | :---: |
| 20 | $\bullet$ | - |
| 20A | $\bullet$ | - |
| 20B(-L) | - | $\bullet$ |
| $20 \mathrm{C}(-$ L) | - | $\bullet$ |

The bracket configuration allows for mounting in four orientations.

## IO-Link Compatible ZSE20B(F)-L/SSE20B-L, ZSE20C(F)-L/ISE20C(H)-L pp. 15, 27

Visualization of operation/equipment status/Remote monitoring and control by communication

## Implement diagnostic bits in the process data.

The diagnostic bit in the cyclic process data makes it easy to find problems with the equipment. It is possible to find problems with the equipment in real time using the cyclic (periodic) data and to monitor such problems in detail with the noncyclic (aperiodic) data.

Process Data

| Bit offset | Item | Note |  |
| :---: | :---: | :--- | :--- |
| 0 | OUT1 output | $0:$ OFF $\quad$ 1: ON |  |
| 1 | OUT2 output | $0:$ OFF $\quad$ 1: ON |  |
| 2 | Diagnosis | 0: Normal $\quad$ 1: Abnormal |  |
| 3 to 15 | Measured pressure value | Unsigned 13 bit |  |

## Diagnosis items

Internal product malfunction Outside of zero-clear range Outside of rated pressure range Upper temperature limit exceeded inside the product

| Bit offset | 15 | 14 | 13 | 12 | 11 | 10 | 9 | 8 | 7 | 6 | 5 | 4 | 3 | 2 | 1 | 0 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Item | Measured pressure value |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Display function

Displays the output communication status and indicates the presence of communication data

Operation and Display

| Communication with master | IO-Link status indicator light |  | Status |  |  | Screen display*3 | Description |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Yes | COM** | *22 | IO-Link mode | $\begin{aligned} & \overline{0} \\ & \text { Ey } \\ & \text { Z } \end{aligned}$ | Operate |  | Normal communication status (readout of measured value) |
|  |  | $\begin{gathered} 0 * 2 \\ \text { (Flashing) } \end{gathered}$ |  |  | Start up <br> Preoperate |  | At the start of communication |
|  |  |  |  |  | Version does not match | $\left[\begin{array}{lll} 5 & 15 \\ & \\| 1 \\ & \\| 1 \\ \hline 10 \end{array}\right.$ | The IO-Link version does not match that of the master. The master uses version 1.0. <br> * The applicable IO-Link version is 1.1. |
|  |  |  |  |  | Lock | MLIIL | Backup and restore required due to data storage lock |
| No | OFF |  |  |  | Communication disconnection |  | Normal communication was not received for 1 s or longer. |
|  |  | OFF |  | 10 | ode |  | General switch output |

[^0]Pressure Switch (for Low Pressure) ZSE20AF-X576 to 580 Made to Order p. 47
Able to detect and display pressures of 10 kPa or less

## With zero-cut function

When the pressure display value is close to zero, this function forces the display to zero.
The range within which to display zero can be changed in 0.1 \% increments as long as it is within 0.0 \% to $10.0 \%$ of the atmospheric pressure and the upper limit of the rated pressure range.

Zero-cut function (When set to $1 \%$ )
$-500 \mathrm{~Pa} \rightarrow \cdots \rightarrow-5 \rightarrow 0 \rightarrow 5 \rightarrow \cdots \rightarrow 500 \mathrm{~Pa}$

Applications

| Flow control | Liquid level detection | Liquid Level Detection Range (for water) |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Pressure range | Liquid level detection range | Min. set value |
|  |  | $\pm 500 \mathrm{~Pa}$ | 50 mm | 0.1 mm |
|  |  | $\pm 1 \mathrm{kPa}$ | 100 mm | 0.1 mm |
|  |  | $\pm 2 \mathrm{kPa}$ | 200 mm | 1 mm |
|  | Can detect the liquid level | $\pm 5 \mathrm{kPa}$ | 500 mm | 1 mm |
|  |  | $\pm 10 \mathrm{kPa}$ | 1000 mm | 1 mm |

## For General Fluids ZSE20C(F)/ISE20C(H) p. 25

## Stainless diaphragm

Oil-free (Single-layer diaphragm structure)
Sensor unit: Stainless steel 630
Fitting parts: Stainless steel 304
A stainless steel 316 L option is also available for the sensor unit and fitting parts.

## Welded structure for sensor units and fitting parts

Select from a face seal or compression fitting.

## Applications

Select from 2 piping directions. Rear ported

## Applicable Fluid Examples

- Water • Hydraulic fluid (JIS-K2213) • Silicone oil - Lubricant - Fluorocarbon - Argon - Carbon dioxide - Air-containing drainage - Nitrogen

## Made to Order p. 42

- Parts in contact with fluid: Stainless steel 316L (-X500) This pressure switch has increased corrosion resistance due to the use of stainless steel 316L for the parts in contact with fluid (pressure sensor and fitting).
- Restrictor-installed fitting (-X510)

A pressure switch that has a restrictor installed in the fitting is available to prevent the sensor from being damaged by water hammer or fluid inertia.

| Spacer for fitting extension | ZS-46-M5A | Made to order (Refer to page 44.) |

# 3-Screen Display High-Precision Digital Pressure Switch ZSE20(F)/ISE20 Series 

For pressure switch precautions and specific product precautions, refer to the "Operation Manual" on the SMC website.

## Specifications

| Model |  |  | ZSE20 (Vacuum pressure) | ZSE20F (Compound pressure) | ISE20 (Positive pressure) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Applicable fluid |  |  | Air, Non-corrosive gas, Non-flammable gas |  |  |
| Pressure | Rated pressure range |  | 0.0 to -101.0 kPa | -100.0 to 100.0 kPa | -0.100 to 1.000 MPa |
|  | Display/Set pressure range |  | 10.0 to -105.0 kPa | -105.0 to 105.0 kPa | -0.105 to 1.050 MPa |
|  | Display/Smallest settable increment |  | 0.1 kPa |  | 0.001 MPa |
|  | Withstand pressure |  | 500 kPa |  | 1.5 MPa |
| Power supply | Power supply voltage |  | 12 to 24 VDC $\pm 10 \%$, Ripple (p-p) $10 \%$ or less |  |  |
|  | Current consumption |  | 25 mA or less |  |  |
|  | Protection |  | Polarity protection |  |  |
| Accuracy | Display accuracy |  | $\pm 2 \%$ F.S. $\pm 1$ digit (Ambient temperature of $25 \pm 3^{\circ} \mathrm{C}$ ) |  |  |
|  | Repeatability |  | $\pm 0.2$ \% F.S. $\pm 1$ digit |  |  |
|  | Temperature characteristics |  | $\pm 2$ \% F.S. ( $25^{\circ} \mathrm{C}$ standard) |  |  |
| Switch output | Output type |  | NPN or PNP open collector 1 output |  |  |
|  | Output mode |  | Hysteresis mode, Window comparator mode, Error output, Output OFF |  |  |
|  | Switch operation |  | Normal output, Reversed output |  |  |
|  | Max. load current |  | 80 mA |  |  |
|  | Max. applied voltage (NPN only) |  | 28 V |  |  |
|  | Internal voltage drop (Residual voltage) |  | 1 V or less (at load current of 80 mA ) |  |  |
|  | Delay time*1 |  | 1.5 ms or less (with anti-chattering function: $20,100,500,1000,2000,5000 \mathrm{~ms}$ ) |  |  |
|  | Hysteresis | Hysteresis mode | Variable from 0*2 |  |  |
|  |  | Window comparator mode |  |  |  |
|  | Short circuit protection |  | Yes |  |  |
| Display | Unit*3 |  | MPa, kPa, kgf/cm², bar, psi, inHg, mmHg |  | MPa, kPa, kgf/cm², bar, psi |
|  | Display type |  | LCD |  |  |
|  | Number of screens |  | 3-screen display (Main screen, Sub screen x 2) |  |  |
|  | Display colour |  | 1) Main screen: Red/Green <br> 2) Sub screen: Orange |  |  |
|  | Number of display digits |  | 1) Main screen: 4 digits ( 7 segments) <br> 2) Sub screen: 4 digits (Upper 1 digit 11 segments, 7 segments for other) |  |  |
|  | Indicator light |  | Lights up when switch output is turned ON. OUT1: Orange |  |  |
| Digital filter*4 |  |  | 0, 10, 50, 100, 500, 1000,5000 ms |  |  |
| Environmental resistance | Enclosure |  | IP40 |  |  |
|  | Withstand voltage |  | 1000 VAC for 1 minute between terminals and housing |  |  |
|  | Insulation resistance |  | $50 \mathrm{M} \Omega$ or more (500 VDC measured via megohmmeter) between terminals and housing |  |  |
|  | Operating temperature range |  | Operating: -5 to $50^{\circ} \mathrm{C}$, Stored: -10 to $60^{\circ} \mathrm{C}$ (No condensation or freezing) |  |  |
|  | Operating humidity range |  | Operating/Stored: 35 to $85 \%$ RH (No condensation) |  |  |
| Standards |  |  | UL/CSA (E216656), CE/UKCA marking |  |  |
| Length of lead wire with connector |  |  | 2 m |  |  |

Value without dital fiter (atoms)
2 m
*1 Value without digital filter (at 0 ms )
*2 If the applied pressure fluctuates around the set value, the hysteresis must be set to a value greater than the amount of fluctuation, or chattering will occur.
*3 Setting is only possible for models with the units selection function. Only MPa or kPa is available for models without this function.
*4 The response time indicates when the set value is $90 \%$ in relation to the step input.

* Products with tiny scratches, marks, or display colour or brightness variations which do not affect the performance of the product are verified as conforming products.

|  |  | Output impedance | Approx. $1 \mathrm{k} \Omega$ |  |  |
|  | Current output | Output type | Current outp | ut: 4 to 20 mA | Current output: 2.4 to 20 mA |
|  |  | Load impedance | Maximum load impedance at power supply voltage of $12 \mathrm{~V}: 300 \Omega$ at power supply voltage of 24 V : $600 \Omega$ Minimum load impedance: $50 \Omega$ |  |  |
| Auto-shift input | Input type |  | Non-voltage input: 0.4 V or less |  |  |
|  | Input mode |  | Select from Auto-shift or Auto-shift zero. |  |  |
|  | Input time |  | 5 ms or more |  |  |
| Display | Unit*3 |  | MPa, kPa, kgf/cm², | bar, psi, inHg, mmHg | MPa, kPa, kgf/cm², bar, psi |
|  | Display type |  | LCD |  |  |
|  | Number of screens |  | 3-screen display (Main screen, Sub screen x 2) |  |  |
|  | Display colour |  | 1) Main screen: Red/Green <br> 2) Sub screen: Orange |  |  |
|  | Number of display digits |  | 1) Main screen: 4 digits ( 7 segments) <br> 2) Sub screen: 4 digits (Upper 1 digit 11 segments, 7 segments for other) |  |  |
|  | Indicator light |  | Lights up when switch output is turned ON. OUT1, OUT2: Orange |  |  |
| Digital filter*4 |  |  | 0, 10, 50, 100, 500, 1000, 5000 ms |  |  |
| Environmental resistance | Enclosure |  | IP40 |  |  |
|  | Withstand voltage |  | 1000 VAC for 1 minute between terminals and housing |  |  |
|  | Insulation resistance |  | $50 \mathrm{M} \Omega$ or more ( 500 VDC measured via megohmmeter) between terminals and housing |  |  |
|  | Operating temperature range |  | Operating: -5 to $50^{\circ} \mathrm{C}$, Stored: -10 to $60^{\circ} \mathrm{C}$ (No condensation or freezing) |  |  |
|  | Operating | humidity range | Operating/Stored: 35 to $85 \%$ RH (No condensation) |  |  |
| Standards |  |  | UL/CSA (E216656), CE/UKCA marking |  |  |
| Length of lead wire with connector |  |  | 2 m |  |  |

1 Value without digital filter (at 0 ms )
*2 If the applied pressure fluctuates around the set value, the hysteresis must be set to a value greater than the amount of fluctuation, or chattering will occur.
*3 Setting is only possible for models with the units selection function. Only MPa or kPa is available for models without this function.
*4 The response time indicates when the set value is $90 \%$ in relation to the step input.

* Products with tiny scratches, marks, or display colour or brightness variations which do not affect the performance of the product are verified as conforming products.

|  | Vendor ID |  |  | 131 (0x0083) |  |  |

*1 Value without digital filter (at 0 ms )
*2 If the applied pressure fluctuates around the set value, the hysteresis must be set to a value greater than the amount of fluctuation, or chattering will occur.
*3 Setting is only possible for models with the units selection function. Only MPa or kPa is available for models without this function.
*4 The response time indicates when the set value is $90 \%$ in relation to the step input.
*5 The configuration file can be downloaded from the SMC website, https://www.smc.eu

* Products with tiny scratches, marks, or display colour or brightness variations which do not affect the performance of the product are verified as conforming products.

## ZSE20 $\square(F) / I S E 20 \square$ Series

## Set Pressure Range and Rated Pressure Range

Set the pressure within the rated pressure range.
The set pressure range is the range of pressure within which setting is possible. The rated pressure range is the range of pressure that satisfies the specifications (accuracy, linearity, etc.) of the switch. Although it is possible to set a value outside the rated pressure range, the specifications cannot be guaranteed even if the value stays within the set pressure range.

## Functions

| Sub screen setting function | The display of the sub screen can be selected. |
| :---: | :---: |
| Auto-preset function | This function calculates a rough set value automatically based on the on-going operation. |
| Display value fine adjustment function | Evens out deviations in the displayed value |
| Peak value indication function | Can retain the maximum pressure value displayed during measurement |
| Bottom value indication function | Can retain the minimum pressure value displayed during measurement |
| Key-lock function (Selectable security code) | The keyboard can be locked to prevent the accidental operation of the operation switch. |
| Zero-clear function | The pressure display can be set to zero when the pressure is open to the atmosphere. |
| Error indication function | This function displays the error location and content when a problem or error has occurred. |
| Anti-chattering function | Prevents possible malfunctions due to sudden fluctuations in the primary pressure by adjusting the delay time |
| Units selection function | Can convert the display value |
| Power saving mode | Reduces power consumption |
| Display resolution switch function | Converts the display resolution from the normal value of $1 / 1000$ to $1 / 100$ Can reduce flickering of the monitor |
| $\mathbf{k P a} \leftrightarrow$ MPa switch function | Converts the unit between kPa and MPa |
| Copy function*1 | The settings of the copy source can be copied to the copy destination. |
| Auto-shift function*1 | Measures the pressure at the time of external input and uses it as a reference to correct the set value of the switch |

*1 Value without digital filter (at 0 ms )
*2 If the applied pressure fluctuates around the set value, the hysteresis must be set to a value greater than the amount of fluctuation, or chattering will occur
*3 Setting is only possible for models with the units selection function. Only MPa or kPa is available for models without this function.
*4 The response time indicates when the set value is $90 \%$ in relation to the step input.
*5 The configuration file can be downloaded from the SMC website, https://www.smc.eu

* Products with tiny scratches, marks, or display colour or brightness variations which do not affect the performance of the product are verified as conforming products.

## Piping Specifications and Weights

## ZSE20C(F)/ISE20C(H) Series

## Set Pressure Range and Rated Pressure Range

Set the pressure within the rated pressure range.
The set pressure range is the range of pressure within which setting is possible. The rated pressure range is the range of pressure that satisfies the specifications (accuracy, linearity, etc.) of the switch. Although it is possible to set a value outside the rated pressure range, the specifications cannot be guaranteed even if the value stays within the set pressure range.

## Analogue Output

## Voltage output <br> Current output

| Range | Rated pressure range | A | B | C |
| :---: | :---: | :---: | :---: | :---: |
| For vacuum <br> pressure | 0.0 to -101.0 kPa | 10.1 kPa | 0 | -101.0 kPa |
| For compound <br> pressure | -100.0 to 100.0 kPa | - | -100.0 kPa | 100.0 kPa |
| For positive <br> pressure | -0.100 to 1.000 MPa | -0.100 MPa | 0 | 1.000 MPa |
|  | -0.100 to 2.00 MPa | $-0.100 \mathrm{MPa}^{* 1}$ | 0 | 2.00 MPa |

*1 Analogue output is $0.8[\mathrm{~V}]$ or $3.2[\mathrm{~mA}]$ at the pressure A .

## Functions

| Sub screen setting function | The display of the sub screen can be selected. |
| :---: | :---: |
| Auto-preset function | This function calculates a rough set value automatically based on the on-going operation. |
| Display value fine adjustment function | Evens out deviations in the displayed value |
| Peak value indication function | Can retain the maximum pressure value displayed during measurement |
| Bottom value indication function | Can retain the minimum pressure value displayed during measurement |
| Key-lock function (Selectable security code) | The keyboard can be locked to prevent the accidental operation of the operation switch. |
| Zero-clear function | The pressure display can be set to zero when the pressure is open to the atmosphere. |
| Error indication function | This function displays the error location and content when a problem or error has occurred. |
| Anti-chattering function | Prevents possible malfunctions due to sudden fluctuations in the primary pressure by adjusting the delay time |
| Units selection function | Can convert the display value |
| Power saving mode | Reduces power consumption |
| Display resolution switch function | Converts the display resolution from the normal value of $1 / 1000$ to $1 / 100$ Can reduce flickering of the monitor |
| $\mathrm{kPa} \leftrightarrow$ MPa switch function | Converts the unit between kPa and MPa |
| Copy function*1 | The settings of the copy source can be copied to the copy destination. |
| Auto-shift function*1 | Measures the pressure at the time of external input and uses it as a reference to correct the set value of the switch |

*1 Not available for the 20C(F/H)-L

## Dimensions

If there is a possibility that the atmospheric vent port of the switch will be exposed to water or dust, insert a tube into the atmospheric vent port and route the other end of the tube to a safe place away from water or dust.

* For tubing, please use the SMC TU0425 (polyurethane, O.D. Ø 4, I.D. Ø 2.5) for the pressure switch.

N02

* If it is expected that the pressure, such as water hammer or surge pressure, will fluctuate rapidly, refer to the precautions in the Operation Manual on the SMC website, https://www.smc.eu

## ZSE20 $\square(F) / I S E 20 \square$ Series Function Details

Display examples of the main and sub (set value) screens of each mode. (For ISE20 $\square$ (for Positive pressure))

## Function Details

The $\mathrm{F} \square$ in () shows the function code number. For details about operation procedures and function codes, refer to the "Operation Manual" on the SMC website.

## A Auto-preset function (F4)

This function, when selected in the initial setting, calculates and stores the set value from the measured pressure. For example, if this function is used for suction verification, the optimum set value is determined automatically by performing suction and release of several workpieces.

Suction Verification

* When using with IO-Link, the set values cannot be changed by communication.

Formula for Obtaining the Set Value

| P_1 or n_1 | H_1 |
| :---: | :---: |
| P_1=A-(A-B)/4 <br> $n \_1=B+(A-B) / 4$ | $H \_1=(A-B) / 2$ |

## B Display value fine adjustment function (F6)

Fine adjustment of the indicated value of the pressure sensor can be made within the range of $\pm 5 \%$ of the read value. (This eliminates wide variations of the indicated value.)

- Indicated value at the time of shipment
「-- Adjustable range of display value fine adjustment function
* When the display value fine adjustment function is used, the set pressure value may change $\pm 1$ digit.

## C Peak/Bottom value display

This function constantly detects and updates the maximum (minimum) pressure when the power is supplied, and allows to hold the maximum (minimum) pressure value.
The held value is maintained even if the power supply is cut.
When the $\mathbf{5}$ and buttons are simultaneously pressed for 1 second or longer, while "holding", the held value will be reset.

## D Key-lock function

This function prevents operation errors such as accidentally changing setting values.

## E Zero-clear function

This function clears and resets the zero value on the display of measured pressure.
The indicated value can be adjusted within $\pm 7 \%$ F.S. of the pressure at the time of shipment from the factory. (ZSE20 $\square$ F (for compound pressure): $\pm 3.5 \%$ F.S.)

## F Error display function

When an error or abnormality arises, the location and contents are displayed.

| Error name | Error code | Description | Action |
| :---: | :---: | :---: | :---: |
| Over current error |  | A load current of 80 mA or more is applied to the switch output. | Eliminate the cause of the over current by turning off the power supply and then turn it on again. |
| Residual pressure error |  | During zero-clear operation, pressure over $\pm 7 \%$ F.S. ( $\pm 3.5 \%$ F.S. for compound pressure) is present. Note that the mode is returned to measurement mode automatically 1 second later. The zero-clear range varies by $\pm 1 \%$ F.S. due to variation between individual products. | Perform zero-clear operation again after restoring the applied pressure to an atmospheric pressure condition. |
| Applied pressure error | प1\%14 | Supply pressure exceeds the maximum set pressure. | Reset applied pressure to a level within the set pressure range |
|  | LLL | Supply pressure is below the minimum set pressure. |  |
| System error |  | An internal data error has occurred. | Turn the power off and then on again. If the error cannot be solved, please contact SMC for investigation. |
| Copy error | $\left[\begin{array}{ll} {\left[\begin{array}{ll} {[r} & 17 \\ 5 i p_{U} \end{array}\right]} \\ \hline \end{array}\right]$ | The copy function does not operate properly. | Atter clearing the error by pressing the and $\square$ buttons simultaneously for a minimum of 1 second, check the wiring and the model, and then attempt to copy again. |
| IO-Link master version error |  | The IO-Link version does not match that of the master. | Ensure that the master IO-Link version matches the device version. |

If the error cannot be solved after the instructions above are performed, or errors other than those above are displayed, please contact SMC for investigation.

## Function Details

## G Anti-chattering function (Simple setting mode or F1, F2)

A large bore cylinder or ejector consumes a large volume of air during operation and may experience a temporary drop in the supply pressure.
This function prevents detection of such temporary drops in the supply pressure as an error by changing the delay time setting.

$$
\begin{gathered}
\text { Available delay time settings } \\
\hline 1.5 \mathrm{~ms} \text { or less, } 20 \mathrm{~ms}, 100 \mathrm{~ms}, 500 \mathrm{~ms}, 1000 \mathrm{~ms}, 2000 \mathrm{~ms}, 5000 \mathrm{~ms} \\
\hline
\end{gathered}
$$

<Principle>
This function averages pressure values measured during the response time set by the user and then compares the average pressure value with the pressure set point value to output the result on the switch.

## H Units selection function (FO)

Display units can be switched with this function.

| Display unit | MPA | kPA | kGF | bAr | PSi | inCH | mmHG |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\mathrm{MPa}^{* 1}$ | kPa | $\mathrm{kgf} / \mathrm{cm}^{2}$ | bar | psi | inHg | mmHg |
| SSE20st settable increment | (Vacuum pressure) | 0.001 | 0.1 | 0.001 | 0.001 | 0.01 | 0.1 |
| ZSE20 $\square \mathrm{F}$ (Compound pressure) | 0.001 | 0.1 | 0.001 | 0.001 | 0.02 | 0.1 | 1 |
| ISE20 $\square$ (Positive pressure) | 0.001 | 1 | 0.01 | 0.01 | 0.1 |  |  |
| ISE20 $\square \mathrm{H}$ (Positive pressure) | 0.001 | 1 | 0.01 | 0.01 | 0.2 |  |  |

*1 The ZSE20 $\square$ (vacuum pressure) and ZSE20 $\square$ F (compound pressure) will have different setting and display resolution when the unit is set to MPa.

## I Selection of power saving mode (F80)

The power saving mode can be selected.
With this function, if no buttons are pressed for 30 s , it shifts to power saving mode.
At the time of shipment from the factory, the product is set to the normal mode (the power saving mode is turned off).
(During power saving mode, [ECo] will flash in the sub screen and the operation light will be ON (only when the switch is ON).)

## J Setting of security code (F81)

The user can select whether a security code must be entered to release the key lock.
At the time of shipment from the factory, it is set such that a security code is not required.

## Function Details

The $\mathrm{F} \square$ in () shows the function code number. For details about operation procedures and function codes, refer to the "Operation Manual" on the SMC website.

## K Copy function (F97) (ZISE20A, 20B, 20C series only)

The set values of the sensor can be copied.
This can reduce setting labour and minimize the risk of setting mistakes.
The set value can be copied to up to 10 switches simultaneously.
(Maximum transmission distance: 4 m )

* This function is not provided with the IO-Link compatible type.

1) Wire as shown in the figure on the left.
2) All sensors are set to copy destination when first purchased. (Default condition is the sensor to be copied to.)
3) Press the 5 button on the source sensor to start copying.

## L Auto-shift function (F5) (ZISE20A, 20B, 20C series only)

When there are large fluctuations in the supply pressure, the switch may fail to operate correctly. The auto-shift function compensates for such supply pressure fluctuations. It measures the pressure at the time of auto-shift signal input and uses it as the reference pressure to correct the set value on the switch.

Set value correction by auto-shift function

When the auto-shift function is selected, "R5 in 000 " will be displayed on the sub screen for about 1 second, and the pressure value at that point will be saved as reference value "[.5." Based on the saved reference value, output on-off points controlled by set values*2 such

*2 When an output is reversed, output on-off points displayed at " $n_{-} 1$, " " $H_{-} 1, "$ " $n_{-}$Z," and " $H_{-}$?" will be rectified.
The above is an example in hysteresis mode. On-off points are similarly rectified in window comparator mode. Outputs that enable the auto-shift function can be changed via the settings.

## ZSE20 $\square(F) / I S E 20 \square$ Series <br> Made to Order

Please contact SMC for detailed dimensions, specifications, and delivery times.
1 Parts in Contact with Fluid: Stainless Steel 316L

This pressure switch has better corrosion resistance because it uses stainless steel 316 L for the parts in contact with fluid (pressure sensor and fitting).

## How to Order

## Specifications

| Model | ZSE20C(F) | ISE20C |
| :---: | :---: | :---: |
| Withstand pressure | 500 kPa | 1.5 MPa |
| Applicable fluid | Liquids and gases that do not <br> corrode stainless steel 316L |  |

Models other than those above have the same specifications as the standard product.

* Not applicable to the rated pressure -0.1 to 2 MPa specifications (ISE20CH)
* A restrictor (equivalent to -X510) is installed inside the fitting. (Piping specifications A2(L) and B2(L) are excluded.)

## 2 Restrictor-installed Fitting

A restrictor is installed inside the fitting in order to reduce the effects of water collision with inertia force in the piping when adsorption is broken.

How to Order

* Not applicable for piping specifications A2(L) and B2(L)
* There are cases in which this product will not effectively suppress of the effects of water hammer. It is advised that other measures be taken in such cases.

## 3 Grease-free

This is a grease-free product.

* The grease-free specification does not intentionally apply grease to the parts in contact with fluid.

[^5]
## ZSE20 $\square(F) / I S E 20 \square$ Series

Please contact SMC for detailed dimensions, specifications, and delivery times.

This product features a lead wire which is 3 m in length.

5 M8 3-pin Pre-wired Connector (Lead wire length: $\mathbf{5 0 0} \mathrm{mm}$ )

| Symbol | Description |
| :---: | :---: |

| $\mathbf{Y}$ | PNP 2 outputs (+ Copy function) |

> As the product body is shipped with the
> copy function enabled, simply replace the standard product cable with this cable.

6 M12 4-pin Pre-wired Connector (Lead wire length: 100 mm ) $\qquad$ 20B
20C

| Symbol | Description |
| :---: | :---: |
| $\mathbf{X}$ | NPN 2 outputs (+ Copy function) |
| $\mathbf{Y}$ | PNP 2 outputs (+ Copy function) |

* As the product body is shipped with the
copy function enabled, simply replace the
standard product cable with this cable.

Optional lead wire part number: ZS-46-5FM12 (ZS-46-5LM12: Non-waterproof type)

Connector pin assignment

## 7 Lead Wire with Connector (Terminal cover)

By using a waterproof lead wire for the connector portion, terminal exposure can be prevented.

# Made to order ZSE20 $\square(F) / I S E 20 \square$ Series 

Please contact SMC for detailed dimensions, specifications, and delivery times.

## 8 Conversion Cable for the Z/ISE30A Lead Wire with Connector

The conversion cable allows for connection between the existing Z/ISE30A lead wire with connector and the Z/ISE20.

The output specification symbol may vary from that of the existing pressure switch.
Z/ISE30A $\rightarrow$ Z/ISE20 + Conversion Cable Correspondence Table

| Existing digital pressure switch model | Output specification | (1)Pressure switch part no. | (2) Conversion cable part no. |
| :---: | :---: | :---: | :---: |
| Z/ISE30A- $\square$-N- $\square \square \square \square$ | NPN open collector 1 output | Z/ISE20-N- $\square$ - $\square$ - $\square \square \square$ | ZS-46-5LA-X424*1 |
| Z/ISE30A- $\square$-P- $\square \square \square \square$ | PNP open collector 1 output | Z/ISE20-P- $\square$ - $\square-\square \square \square$ |  |
| Z/ISE30A- $\square$-A- $\square \square \square \square$ | NPN open collector 2 outputs | Z/ISE20A-X- $\square$ - $\square$ - $\square \square \square$ |  |
| Z/ISE30A- $\square$-B- $\square \square \square \square$ | PNP open collector 2 outputs | Z/ISE20A-Y- $\square$ - $\square-\square \square \square$ |  |
| Z/ISE30A- $\square$-C- $\square \square \square \square$ | NPN open collector 1 output + Analogue voltage output | Z/ISE20A-R- $\square$ - $\square-\square \square \square$ | ZS-46-5LB-X424*1 |
| Z/ISE30A-D- $\square \square \square \square$ | NPN open collector 1 output + Analogue current output | Z/ISE20A-S- $\square$ - $\square$ - $\square \square \square$ |  |
| Z/ISE30A-E- $\square \square \square \square$ | PNP open collector 1 output + Analogue voltage output | Z/ISE20A-T- $\square$ - $\square$ - $\square \square \square$ |  |
| Z/ISE30A-F- $\square \square \square \square$ | PNP open collector 1 output + Analogue current output | Z/ISE20A-V- $\square$ - $\square$ - $\square \square \square$ |  |

*1 While this conversion cable allows for use of the existing wiring, output and functions other than that of the Z/ISE30A will be invalid (not wired).

## ZS-46-5LA-X424

ZS-46-5LB-X424

## 9 With Spacer for Fitting Extension

Allows for the easier insertion and removal of the lead wire with connector by extending the piping fitting Part number for the spacer for extension: ZS-46-M5A

## ZSE20 $\square(F) / I S E 20 \square$ Series

Please contact SMC for detailed dimensions, specifications, and delivery times.
$10 \square 36 \mathrm{~mm}$ Panel Hole (Compatible with the panel holes of the ZISE40A and ZISE80)

This specification includes a panel mount adapter for the mounting holes of the panel mount used by the Z/ISE40A and Z/ISE80.

| Option 2 |  |
| :---: | :---: |
| Symbol | Description |
| B | Panel mount adapter |
| D | Panel mount adapter + Front protection cover |

Enter the standard product number. (pp. 13, 25)

## Compatible with the panel holes of the Z/ISE40A

B
Panel mount adapter (Part no.: ZS-46-F)

## D

Panel mount adapter + Front protection cover (Part no.: ZS-46-G)

## Panel fitting dimensions

## Made to Order ZSE20 $\square(F) / I S E 20 \square$ Series

Please contact SMC for detailed dimensions, specifications, and delivery times.

Compatible with the panel holes of the ZISE80

## B

Panel mount adapter
(Rear ported)
(Part no.: ZS-46-F)

## D

Panel mount adapter + Front protection cover (Rear ported)
(Part no.: ZS-46-G)

## Panel fitting dimensions (Rear ported)

Individual mounting

Multiple (2 pcs. or more) secure mounting <Horizontal>

Panel mount example <Horizontal>

## 11 Pressure Switch (for Low Pressure)

Able to detect and display pressures of 10 kPa or less

## How to Order

## 

1 Output specification

| Symbol | Description |
| :---: | :--- |
| A | NPN open collector 2 outputs + Copy function |
| B | PNP open collector 2 outputs + Copy function |
| C | NPN open collector 1 output + Analogue voltage output + <br> External zero-clear*1 |
| D | NPN open collector 1 output + Analogue current output + <br> External zero-clear*1 |

2 Unit specification

| Symbol | Description |
| :---: | :--- |
| - | Units selection function |
| $\mathbf{M}$ | Sl units only*1 |

*1 Fixed units: kPa, Pa

Piping specification

*1 Can be switched to copy function
Option 1

| Symbol | Description |  |
| :---: | :---: | :---: |
| - | Without lead wire |  |
| J | Lead wire with connector (5-core, 2 m lead wire) |  |

* For the lead wire with M12 connector, refer to page 43.

Option 3

| Symbol | Calibration certificate |
| :---: | :---: |
| - | - |
| $\mathbf{K}$ | $\bigcirc$ |

7 Rated pressure range

| Symbol | Description |
| :---: | :---: |
| X576 | -500 to 500 Pa |
| X577 | -1.000 to 1.000 kPa |
| X578 | -2.00 to 2.00 kPa |
| X579 | -5.00 to 5.00 kPa |
| X580 | -10.00 to 10.00 kPa |

Options/Part Nos.
When only optional parts are required, order with the part numbers listed below

| Description | Part no. | Note |
| :--- | :--- | :--- |
| Bracket A | ZS-46-A1 | Tapping screw: Nominal size 3 x 8 L (2 pcs.) $)$ |
| Bracket B | ZS-46-A2 | Tapping screw: Nominal size 3 x 8 L (2 pcs.) |
| Panel mount adapter | ZS-46-B | - |
| Panel mount adapter + Front protection cover | ZS-46-D | - |
| Lead wire with connector | ZS-46-5L | 5-core, 2 m, Non-waterproof (Without waterproof cover) |

Specifications

For specifications other than those shown above, refer to page 12.

## Dimensions

## ZSE20AF- $\square$ - $\square$-M5- $\square \square \square$-X576 to X580

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC) ${ }^{11}$, and other safety regulations.

Caution:
Caution indicates a hazard with a low level of risk
which, if not avoided, could result in minor or moderate injury.
Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.
Danger indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

## $\triangle$ Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.
Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.
2. Only personnel with appropriate training should operate machinery and equipment.
The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.
3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.
4. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
5. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
6. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.
7. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.
8. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
9. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue.
10. An application which could have negative effects on people, property, or animals requiring special safety analysis.
11. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

## . Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.
If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary. If anything is unclear, contact your nearest sales branch.

1) ISO 4414: Pneumatic fluid power - General rules relating to systems. ISO 4413: Hydraulic fluid power - General rules relating to systems. IEC 60204-1: Safety of machinery - Electrical equipment of machines. (Part 1: General requirements)
ISO 10218-1: Manipulating industrial robots - Safety. etc.

## Limited warranty and Disclaimer/Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements". Read and accept them before using the product.

## Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first. ${ }^{2)}$ Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.
2) Vacuum pads are excluded from this 1 year warranty. A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

## Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

## Caution

SMC products are not intended for use as instruments for legal metrology.
Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country.
Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

| Revision History |  |  |
| :--- | :--- | :--- | :--- |
| Edition B | - New variations (for general fluids, IP65, 2 outputs, and <br> analog output) have been added. <br> - Number of pages has been increased from 16 to 36. | VX |
| Edition C | - The IO-Link compatible type has been added. <br> - Number of pages has been increased from 36 to 40. | WR |
| Edition D | - Made to order options have been added. <br> - A One-touch fitting type has been added to the piping <br> specifications. <br> - Number of pages has been increased from 40 to 44. | YY |
| Edition E | - An IO-Link compatible type has been added. <br> (Z/ISE20C series) | BT |
| - A low pressure range type has been added. |  |  |
| (Z/ISE20A series) |  |  |
| - An M12 connector compatible type has been added. |  |  |
| (Made to Order) |  |  |
| - The number of pages has been increased from 44 to 52. |  |  |
